

**State Railway Inspectorate under the Ministry of Transport and Communications of Lithuania –  
the National Safety Authority of the Republic of Lithuania**  
**Report for 2006**

**A.1. Scope of the report**

Įgyvendinant Direktyvos 2004/49/EB 18 straipsnio ir 23 straipsnio 3 dalies reikalavimus pateiktoje metinėje ataskaitoje yra apibendrinami Inspekcijos darbo rezultatai, pateikiama informacija apie 2006 m. atliktus patikrinimus, saugos srityje duotus įpareigojimus ir veiksmus, kurių buvo imtasi vadovaujantis anksčiau išleistomis rekomendacijomis, pateikiamos eismo saugos geležinkelio transporte užtikrinimo tendencijos bei problemos, su kuriomis susiduriama įgyvendinant Inspekcijai pavestas funkcijas.

Taip pat ataskaitoje yra pateikiami svarbiausi teisės aktų, reglamentuojančių geležinkelio transporto eismo saugą, pasikeitimai, eismo saugos raida bendrujų saugos rodiklių srityje, eismo įvykių statistiniai duomenys.

Implementing articles 18 and 23.3 of Directive 2004/49/EC in this annual report are given result of the Inspectorate work, information accounting for the inspections carried out in 2006, the safety obligations that were issued and actions taken in accordance with recommendations issued previously, safety trends in the railway field, problems as well as reached results.

Also important changes in legislation concerning railway safety, the development of railway safety on CSIs, statistical data of accidents are given in this report.

**B.1. Introductory Section**

2006 metais, įgyvendinant Europos Sajungos teisės aktų reikalavimus, buvo pakeisti pagrindiniai Inspekcijos veiklą reglamentuojantys teisės aktai ir Inspekcija įgijo naujų teisių ir pareigų, pavestoms funkcijoms įgyvendinti. Pagrindinės Inspekcijos funkcijos vadovaujantis Inspekcijos nuostatų, patvirtintų 2006 m. gruodžio 27 d. Lietuvos Respublikos susisiekimo ministro įsakymu, 6 punktu yra:

- licencijų verstis geležinkelio transporto ūkine komercine veikla išdavimas, licencijuojamos veiklos sąlygų vykdymo kontrolė;
- saugos sertifikatų geležinkelio įmonėms (vežėjams) išdavimas, jų galiojimo sustabdymas, geležinkelio įmonėms (vežėjams) nustatyti saugos sertifikavimo sąlygų reikalavimų laikymosi kontrolė, igaliojimų eismo saugos srityje geležinkelio infrastruktūros valdytojams išdavimas, jų galiojimo sustabdymas, geležinkelio infrastruktūros valdytojams nustatyti sąlygų ir reikalavimų laikymosi kontrolė;
- geležinkelio transporto eismo organizavimo ir valdymo kontrolė, geležinkelio infrastruktūros, riedmenų bei konteinerių techninės

Implementing the requirement of EU, the main legal act regulating the activity of the Inspectorate were changed and new functions to the Inspectorate according to article 6 of the Regulation of the Inspectorate were delegated – approved on 27 December 2006 by Order No. 3-505 of the Ministry of Transport and Communications are:

- issuing for carriage operations by railway, supervise compliance with the conditions of licensed activity;
- issuing of safety certifications to railway undertakings (operators) and safety authorizations to infrastructure managers, control of compliance with the requirements prescribed in laws and other legislation concerning railway operations and safety issues;
- railway transport traffic organization and control of management, control of compliance with the requirements prescribed in laws and other

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## C. Organisation

### C.1. Introduction to the organization

|                                                                                                                                                                                                                              |                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Inspekcija yra vykdomosios valdžios institucija pavaldži Lietuvos Respublikos susisiekimo ministerijai, atliekančiai priežiūros funkcijas. Inspekcija, analizuojant jos organizacinię, teisinę struktūrą ir sprendimų</p> | <p>The Inspectorate is a state administrative institution, subordinate to the Ministry of Transport and Communications in a form of supervision. The Inspectorate is an independent state institution in its organization, legal</p> |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

priėmimo procesą, yra nuo geležinkelio įmonių (vežėjų), geležinkelio infrastruktūros valdytojų bei kitų geležinkelijų transporto subjektų nepriklausoma institucija, įsteigta 1993 m. Inspekcijos kaip Nacionalinės Saugos Institucijos funkcijos buvo nustatytos Lietuvos Respublikos eismo saugos įstatymu.

Siekiant įgyvendinti Direktyvos 2004/49/EB 16 straipsnyje išdėstytais užduotis, Inspekcijai buvo pavestos naujos funkcijos ir jos veikla apibrėžta 2006 m. gruodžio 27 d. Inspekcijos nuostatais, patvirtintais Lietuvos Respublikos susisiekimo ministro įsakymu.

Galima būtų išskirti dvi pagrindines Inspekcijos funkcijas:

- eismo saugos kontrolė (Inspekcija yra atsakinga už geležinkelijų transporto eismo saugos problemų geležinkelijų transporto srityje sprendimą, geležinkelijų infrastruktūros registravimą, riedmenų registro valdymą. Atsižvelgiant į tai, Inspekcija yra įpareigota parengti ir paskelbti procedūras pagal kurias geležinkelio įmonės (vežėjai) ir geležinkelijų infrastruktūros valdytojai rengs eismo saugos planus);
- rinkos priežiūra (viešosios geležinkelijų infrastruktūros pajėgumų geležinkelio įmonėms (vežėjams) naudotis skyrimas yra pavestas Inspekcijai kol viešoji infrastruktūra bus atskirta nuo geležinkelio įmonės kaip vežėjo funkciją. Pagrindinis minėto skyrimo tikslas – garantuoti prieigą prie geležinkelio infrastruktūros visiems nacionaliniams ir tarptautiniams geležinkelijų transporto rinkos subjektams, eliminuojant galimą jų diskriminavimą. Santykiai tarp geležinkelijų infrastruktūros valdytojo ir geležinkelijų įmonių (vežėjų), teisės, pareigos ir atsakomybė yra nustatyta Lietuvos Respublikos teisės aktų nuostatomis).

Inspekcijos struktūra pateikta Priede B.1.

Siekiant įgyvendinti Inspekcijai pavestas funkcijas, buvo įsteigti keturi skyriai:

- eismo saugos kontrolės skyrius – atlieka geležinkelio transporto subjektų veiklos priežiūrą ir patikrinimus. Šio skyriaus darbuotojai taip pat atsakingi už eismo įvykių tyrimą;
- teisės skyrius – sertifikavimas, licencijavimas, teisinės bazės geležinkelijų transporto srityje kūrimas, siekiant perkelti ES reikalavimus į nacionalinį lygmenį;

structure and decision making from any railway undertaking, infrastructure manager, railway transport entities, established in 10 th of May 1993 by the Resolution of the Government of Republic of Lithuania No.316. The Inspectorate is a National Safety Authority appointed in accordance with the Law on Railway Transport Traffic Safety.

In order to implement the tasks listed in article 16 of Directive 2004/49/EC new functions for the Inspectorate was delegated by law of the Ministry of Transport and Communications of Republic of Lithuania in 2006. and new activity of the Inspectorate is regulated (adopted 27.12.2006).

There are two main functions of the Inspectorate:

- control of traffic safety (the Inspectorate is responsible for safety issues in the railway sector, the registration of railway infrastructure and the management of the rolling-stock register. In addition to this, the Inspectorate is obliged to prepare and to publish the procedures by which Infrastructure managers and Railway Undertakings prepare safety plans);
- market supervision (the allocation of public railway infrastructure capacity is delegated to the Inspectorate until a separate state undertaking is set up. The main objective of the allocation process is to guarantee open and non-discriminatory infrastructure access to all national and foreign railway operating companies. Relationships between Railway Infrastructure Manager and Railway Undertakings (operators), rights, obligations and liability shall be established by an agreement in line with the Lithuanian legislative framework).

The structure of the Inspectorate is showed in ANNEX B.1.

According to functions delegated to the Inspectorate, four divisions were established in the Inspectorate:

- traffic safety division – carries out supervisions and inspections on items of railway operations. The staff is also responsible for investigation of accidents and incidents;
- law division – works with the certifications, licencing, does developing of legal acts in rail sector as well as implementing EU requirements into national legislation;
- market supervision division – the allocation of public railway

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

Valstybinė geležinkelio inspekcija prie Suisiekimo ministerijos:

- Lietuvos Respublikos Vyriausybė formuoja geležinkelį transporto strategiją, koordinuoja jos įgyvendinimą ar atlieka kitas teisės aktuose nustatytas funkcijas;
- Lietuvos Respublikos suisiekimo ministerija:

- 1) įgyvendina geležinkelį transporto politiką;
- 2) organizuoja geležinkelį transporto strateginių objektų kūrimo, modernizavimo ir plėtros, eismo saugos ir aplinkosaugos programų rengimą ir įgyvendinimą;
- 3) koordinuoja tarptautinius ryšius geležinkelį transporto srityje, pagal savo kompetenciją atstovauja Lietuvos Respublikai tarptautinėse organizacijose;
- 4) pagal savo kompetenciją leidžia teisės aktus geležinkelį transporto klausimais ir tiesiogiai ar per įgaliotas institucijas kontroliuoja, kaip šie teisės aktai vykdomi;
- 5) atlieka kitas teisės aktuose nustatytas funkcijas.

- Inspekcija:

- 1) kontroliuoja, kaip juridiniai ir fiziniai asmenys laikosi Lietuvos Respublikos įstatymų, Lietuvos Respublikos tarptautinių sutarčių, kitų teisės aktų, reglamentuojančių geležinkelį transporto eismo saugos klausimus, reikalavimų;
- 2) išduoda licencijas verstis vežimais geležinkelį transportu, prižiūri, kaip laikomasi licencijuojamos veiklos sąlygų, prireikus sustabdo ir panaikina šiu licencijų galiojimą;
- 3) išduoda saugos sertifikatus.

Inspekcijos santykiai su Katastrofų tyrimo vadovu yra apibrėžti geležinkelį transporto eismo įvykių tyrimo ir jų padarinių likvidavimo nuostatais, patvirtintais Lietuvos Respublikos suisiekimo ministro 2003 m. vasario 20 d. įsakymu Nr. 3-79.

Lietuvos Respublikos suisiekimo ministro paskirtas Katastrofų tyrimo vadovas turi katastrofas, taip pat kitus eismo įvykius, atsižvelgdamas į eismo įvykio poveikį geležinkelį transporto eismo saugai ES.

Šiuo tyrimu nesiekiamas nustatyti kieno nors kaltės ar atsakomybės, o siekiama pagerinti eismo saugą ir užtikrinti eismo įvykių prevenciją.

Inspekcijai patikėta funkcija tirti visus eismo įvykius, siekiant nustatyti

the Inspectorate:

- the Government of the Republic of Lithuania shall formulate a railway transport strategy, coordinate its implementation or perform other functions defined in legal acts;
- the Ministry of Transport and Communications shall:
  - 1) implement the railway transport policy;
  - 2) organize the drawing up and implementation of programmes on the creation, upgrading and development of strategic objects in the field of railway transport as well as traffic safety and environmental programmes;
  - 3) coordinate international relations in the field of railway transport and represent, within the scope of its competence, the Republic of Lithuania in international organizations;
  - 4) adopt, within the scope of its competence, legal acts on railway transport issues and control, either directly or through authorized institutions, compliance with such legal acts;
  - 5) perform other functions defined in legal acts.
- the Inspectorate shall:

- 1) control compliance of legal and natural persons with the requirements set out in the laws and international treaties of the Republic of Lithuania as well as in other legal acts governing railway transport safety issues;
- 2) issue licences for carriage operations by rail, supervise compliance with the conditions of licensed activity, suspend or revoke, where relevant, the said licences;
- 3) issue safety certificates.

The relations with the Head of Accidents' Investigation are described in The regulation of investigation and elimination of consequences of railway accidents – adopted on 2 September 2006 by Order No. 3-378 of the Ministry of Transport and Communications of the Republic of Lithuania.

The Head of Accidents' Investigation appointed by the Ministry of Transport and Communications of the Republic of Lithuania investigate catastrophe and other railway transport events, considering the consequences to the railway transport traffic safety in EU.

The investigation exercised by the Head of Accidents' Investigation is

asmenis, pažeidusius eismo saugos reikalavimus ir teisės aktų nustatyta tvarka traukti juos atsakomybėn. Katastrofų tyrimo vadovas, atlikęs eismo įvykio tyrimą, pateikia ataskaitą Lietuvos Respublikos susisiekimo ministerijai. Katastrofų tyrimo vadovas Inspekcijai pateikia rekomendacijas dėl eismo saugos būklės gerinimo. Inspekcija, gavusi eismo saugos rekomendaciją Katastrofų tyrimo vadovui pateikia ataskaitą apie priemones, kurių pagal eismo saugos rekomendacijas buvo imtasi arba planuojama imtis.

Geležinkelio infrastruktūros valdytojo funkcijos yra deleguotos AB „Lietuvos geležinkeliai“. Šiuo metu Lietuvos Respublikos vyriausybė valdo 100 % AB „Lietuvos geležinkeliai“ akcijų.

concerning with prevention of railway transport events and improving of the railway safety conditions, not with the establishment of fault and responsibility of persons.

Functions of investigation of accidents and incidents concerning the establishment of fault and responsibility are delegated to the Inspectorate. Report of accident investigation is submitted to the Ministry of Transport and Communications of the Republic of Lithuania by the Head of Accidents' Investigation. The Head of Accidents' Investigation submit the recommendation of the improving of the railway safety conditions to the Inspectorate. The Inspectorate is obligated to submit the report of taken measures to the Head of Accidents' Investigation.

The functions of Railway Infrastructure Manager are delegated to JSC „Lithuanian Railway“. Right now the Government of Republic of Lithuania owns 100 % of JSC „Lithuanian railway“ shares.

## D. The development of railway safety

### D. 1. Initiatives to maintain/ improve safety performances

D.1.1 - Safety measures triggered by accidents/precursors to these

| <b>Safety measure decided</b> | <b>Accidents/precursors which triggered the measure</b> |              |                                 |
|-------------------------------|---------------------------------------------------------|--------------|---------------------------------|
|                               | <b>Date</b>                                             | <b>Place</b> | <b>Description of the event</b> |
| NO                            |                                                         |              |                                 |

D.1.2 - Safety measures with other triggers

| <b>Safety measure decided</b> | <b>Description of the trigger of the measures</b> |
|-------------------------------|---------------------------------------------------|
| NO                            | NO                                                |

## D.2. Detailed data trend analysis

2006 metais Lietuvos Respublikos geležinkeliuose įvyko 164 geležinkelio transporto eismo įvykiai: katastrofos – 0, avarijos - 66 (gaisrai riedmenyse – 0, susidūrimas - 1, geležinkelio riedmenų nuriedėjimas nuo bėgių – 7, eismo įvykiai pervažose – 21, eismo įvykiai, kai dėl riedančių riedmenų nukentėjo žmonės – 37), riktais – 98.

2006 m. Lietuvos Respublikos geležinkeliuose įvykusiu eismo įvykių statistiniai duomenys pateikti lentelėje D. 2.

There were 164 railway transport events in Lithuanian railways in 2006: catastrophes – 0, accidents – 66 (rolling stock fire – 0, collisions – 1, derailments – 7, railway accidents at level crossings – 21, accidents to persons by rolling stock in motion - 37), precursors to accidents – 98.

Detailed statistical data of the railway transport events in 2006 is showed in Table D. 2.

**Lentelė (Table) D. 2.** Detailed statistical data of the railway transport events in Lithuanian railways in 2006.

|                                                       | Numer of catastrophes | Number of accidents | Number of fatalities | Number of injures | Number of precursors to accidents |
|-------------------------------------------------------|-----------------------|---------------------|----------------------|-------------------|-----------------------------------|
| <b>TOTAL</b>                                          | 0                     | 66                  | 31                   | 22                | 98                                |
| Collisions ( excluding collisions at level crossings) | -                     | 1                   | -                    | -                 | -                                 |
| Derailments                                           | -                     | 7                   | -                    | -                 | -                                 |
| Railway accidents at level crossings                  | -                     | 21                  | 8                    | 8                 | -                                 |
| Accidents to persons by rolling stock in motion       | -                     | 37                  | 23                   | 14                | -                                 |
| Rolling stock fire                                    | -                     | -                   | -                    | -                 | -                                 |

## E. Important changes in legislation and regulation

Esminiai įstatymų leidybos ir reguliavimo pokyčiai, svarbių pokyčių įstatymų leidybos ir reguliavimo srityje detalės yra išdėstyti Priede D.

The essential changes in legislation and regulation, the details of the important changes in legislation and regulation are listed in ANNEX D.

## F. The development of safety certification and authorization

### F.1.National legislation- starting dates- availability

Saugos sertifikatus Inspekcija pradėjo išdavinėti 2004 m., vadovaudamasi Geležinkelio įmonių ir geležinkelio valdytojo saugos sertifikavimo taisyklėmis, patvirtintomis 2003 m. sausio 23 d. Lietuvos Respublikos susisiekimo ministro įsakymu Nr. 3-37.

2004 m. buvo išduoti 4 saugos sertifikatai, 2005 m. – 1 saugos sertifikatas. 2006 m. Saugos sertifikatų geležinkelio įmonėms (vežėjams) nebuvo išduota. (Žiūrėti priedą A).

Saugos sertifikatų geležinkelio įmonėms (vežėjams) ir įgaliojimų eismo saugos srityje geležinkelį infrastruktūros išdavimo procedūra buvo pakeista 2006 m. (Geležinkelio įmonių (vežėjų) ir geležinkelį infrastruktūros valdytojų saugos sertifikavimo taisyklėmis, patvirtintomis 2006 m. rugsėjo 29 d. Lietuvos Respublikos susisiekimo ministro įsakymu Nr. 3-371.

The Inspectorate started issued safety certificates in 2004 according the Rules on Safety Certification of Railway Undertakings and Infrastructure Manager – adopted on 23 January 2003 by Resolution No. 3-37 of Government of the Republic of Lithuania.

It issued four safety certificates in 2004 and one safety certificate in 2005. In 2006 there were no safety certificates issued to Railway Undertakings. (See ANNEX A).

The procedures for handling applications for safety certificates by Railway Undertaking and safety authorizations by Infrastructure Managers have changed since 2006 (Rules on Safety Certification of Railway Undertakings (operators) and Railway Infrastructure Managers - adopted on 29 September 2006 by Resolution No. 3-371 of Government of the Republic of Lithuania.

### F. 2.Numerical data

Saugos sertifikatų ir įgaliojimų eismo saugos srityje išdavimo plėtotė chronologiniu požiūriu yra pateikta Priede E.

All the numerical data on the development of safety certification and safety authorization are described in ANNEX E..

### F.3. Procedural aspects

#### F.3.1. Safety certificates and authorizations

Saugos sertifikatus ir įgaliojimus eismo saugos srityje išduoda Inspekcija. Saugos sertifikatai geležinkelio įmonėms (vežėjams) ir įgaliojimai eismo saugos srityje geležinkelį infrastruktūros valdytojams turi būti išduoti ne vėliau kaip per keturis mėnesius nuo prašymo ir reikiamų dokumentų gavimo dienos.

Inspekcija turi teisę išduoti arba atsisakyti išduoti saugos sertifikatą bei įgaliojimus eismo saugos srityje, taip pat sustabdyti, atšaukti, pakeisti

Issueing of safety certifications and safety authorizations is carried out by the Inspectorate. The safety certificates to Railway Undertakings (operators) and safety authorizations to Infrastructure Manager must be issued in period of four months after the application and all submitted documents for safety certificate or authorizations was received.

The Inspectorate has the right to issue, refuse to issue safety certificate and authorization, terminate the validity of safety certificate and

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>saugos sertifikatų bei įgaliojimų eismo saugos srityje galiojamą. Pareiškėjas, siekdamas gauti saugos sertifikatą ar įgaliojimus eismo saugos srityje, pirmiausia, turi pateikti nustatytos formos prašymą lietuvių kalba ir pateikti reikalaujamus dokumentus.</p> <p>Bendras reikalavimas tiek geležinkelio įmonei (vežėjui), pageidaujančiai gauti saugos sertifikatą, tiek geležinkelį infrastruktūros valdytojui – turėti eismo saugos valdymo sistemą, atitinkančią nustatytus reikalavimus.</p> <p>Geležinkelio įmonių (vežėjų), pageidaujančių gauti saugos sertifikatus bei geležinkelio infrastruktūros valdytojo, pageidaujančio gauti įgaliojimus eismo saugos srityje pateiktoms paraiškoms nagrinėti yra sudaroma komisija iš penkių narių: vieno Lietuvos Respublikos susisiekimo ministerijos atstovo, trijų Inspekcijos atstovų ir vieno viešosios geležinkelio infrastruktūros valdytojo atstovo. Komisija pagal pateiktus dokumentus įvertina, ar geležinkelio įmonė (vežėjas) ir geležinkelio infrastruktūros valdytojas atitinka nustatytus reikalavimus ir teikia Inspekcijai motyvuotą išvadą išduoti arba neišduoti saugos sertifikatą geležinkelio įmonei (vežėjui) arba įgaliojimus eismo saugos srityje geležinkelio infrastruktūros valdytojui.</p> <p>Inspekcija, gavusi komisijos motyvuotą išvadą, ne vėliau kaip per penkias dienas priima sprendimą išduoti arba neišduoti saugos sertifikatą ar įgaliojimus eismo saugos srityje.</p> <p>Kadangi saugos sertifikatų A ir B dalių bei įgaliojimų eismo saugos srityje 2006 m. nebuvo išduota, išsamesnė informacija (priežastys dėl kurių buvo kreiptasi dėl saugos sertifikatų ir įgaliojimų eismo saugos srityje atnaujinimo/pakeitimo) nėra pateikiama.</p> | <p>authorization, cancel the termination of its validity or withdraw a safety certificate and authorization.</p> <p>First of all, the applicant should fill the application form for safety certificate or authorization and to supply submitted documents in Lithuanian language.</p> <p>For the certification of Railway undertakings (operators), a commission of 5 officers from different authorities is to be established: one representative from the Ministry of Transport and Communications, one - from the Public Infrastructure Manager and three from the Inspectorate. The Commission according to the documents submitted to the Inspectorate value if the railway undertaking or infrastructure manager fulfill the requirements and give the reasoned conclusion to the Inspectorate to issue or not the safety certification to Railway Undertaking (operator) or safety authorization to Infrastructure Manager.</p> <p>The Inspectorate shall take a decision regarding the issue of a safety certificate or authorization or refusal to issue safety certificate or authorization on the basis of the reasoned conclusion of the Commission within 5 working days.</p> <p>Because the updating/amending of the Part A/B safety certificates and safety authorizations was not done in 2006, there is no need to give more information in details (the reasons for updating/amending safety authorizations).</p> |

## G. Supervision of Railway Undertakings and Infrastructure Managers

### G.1. Description of the supervision of Railway Undertakings and Infrastructure Managers

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Viena pagrindinių Inspekcijos funkcijų yra geležinkelio įmonių (vežėjų) ir geležinkelio infrastruktūros valdytojų priežiūra. Inspekcija atlieka tiek privačių, tiek viešųjų geležinkelio įmonių (vežėjų) ir geležinkelio infrastruktūros valdytojų priežiūrą. Ataskaita apie geležinkelio įmonių (vežėjų) ir geležinkelio infrastruktūros valdytojų priežiūrą, atliekamą Inspekcijos yra pateikiama Inspekcijos požiūriu, geležinkelio įmonių (vežėjų) ir geležinkelio infrastruktūros valdytojų atlkti vidaus patikrinimai šioje ataskaitoje nėra pateikiami.</p> | <p>One of the main functions of the Inspectorate is supervision of Railway Undertakings (operators) and Railway Infrastructure Managers. Both private and public Railway Undertakings (operators) and Railway Infrastructure Managers are under control. The supervision of Railway Undertakings (operators) and Railway Infrastructure Managers is reported from the Inspection point of view, the internal inspections or audits done by the Railway Undertakings (operators) and Railway Infrastructure Managers in this report are not reported.</p> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

2006 metais, vadovaujantis metiniu Inspekcijos darbo planu, atlikti 566 planuoti patikrinimai: viešosios geležinkelio infrastruktūros valdytojo AB "Lietuvos geležinkelai" - 126, istorinio geležinkelio įmonės (vežėjo) AB "Lietuvos geležinkelai" – 170, privažiuojamieji geležinkelio kelai bei kitos geležinkelio įmonės (vežėjai) – 270.

Patikrinimų rūšys (riedmenų patikrinimai, infrastruktūros patikrinimai, signalizacijos sistemos patikrinimas ir t. t.) nėra išskirtos.

Jei patikrinimų metu nustatomi rimti geležinkelio transporto eismo saugą reglamentuojančių teisės aktų pažeidimai, inspektorai turi teisę uždrausti geležinkelio transporto eismą tam tikra linija, užrausti naudoti riedmenis ir t. t.

2006 m. per patikrinimus nustatyta 1700 geležinkelio transportą reglamentuojančių teisės aktų pažeidimų, dėl jų surašyti 7 administracinių teisės pažeidimų protokolai ir 259 įpareigojimai ir rekomendacijos.

Būtina akcentuoti, kad 97 % Inspekcijos rekomendacijų ir įpareigojimų dėl patikrinimų metu nustatytų pažeidimų buvo įvykdyta.

Nusiskundimų iš geležinkelio įmonių (vežėjų) dėl saugos sertifikato A ir (bei) B dalių išdavimo, geležinkelio infrastruktūros valdytojo dėl įgaliojimų eismo saugos srityje išdavimo nebuvo gauta.

According the annual plan of inspection of the Inspectorate, there were 566 planned inspections made in 2006: public railway Infrastructure Manager JSC "Lithuanian Railway" inspected 126 times, historical Railway Undertaking (operator) JSC "Lithuanian railway" inspected 170 times, inspected approaching railway roads and other Railway Undertakings (operators) – 270.

Modifications of inspections (inspections of rolling stock, inspections of infrastructure, inspections of signaling system and etc.) are not separated.

If there are serious violations of railway transport traffic safety rules discovered during inspections, the inspectors have right to close railway line, suspend the using of the rolling stock and etc.

There were 1700 violations of railway transport traffic safety rules identify in 2006: delivered protocols (penalties) – 7, delivered obligations and recommendations – 259.

It's necessary to mention that 97 % of delivered obligations and recommendations of Inspectorate were fulfilled.

There were no complains from railway Infrastructure Managers concerning Railway Undertakings (operators) related to conditions in their Part A/ Part B certificate and from Railway Undertakings (operators) concerning Railway Infrastructure Managers related to conditions in their authorization.

#### G. 2. Submission of all Infrastructure Managers and Railway Undertakings (operators) annual safety reports according to Article 9(4) Safety Directive by the legal deadline

## H. Conclusions – Priorities – Results of safety recommendations

Inspekcijos veiklos prioritetai geležinkelių transporto eismo saugos srityje:

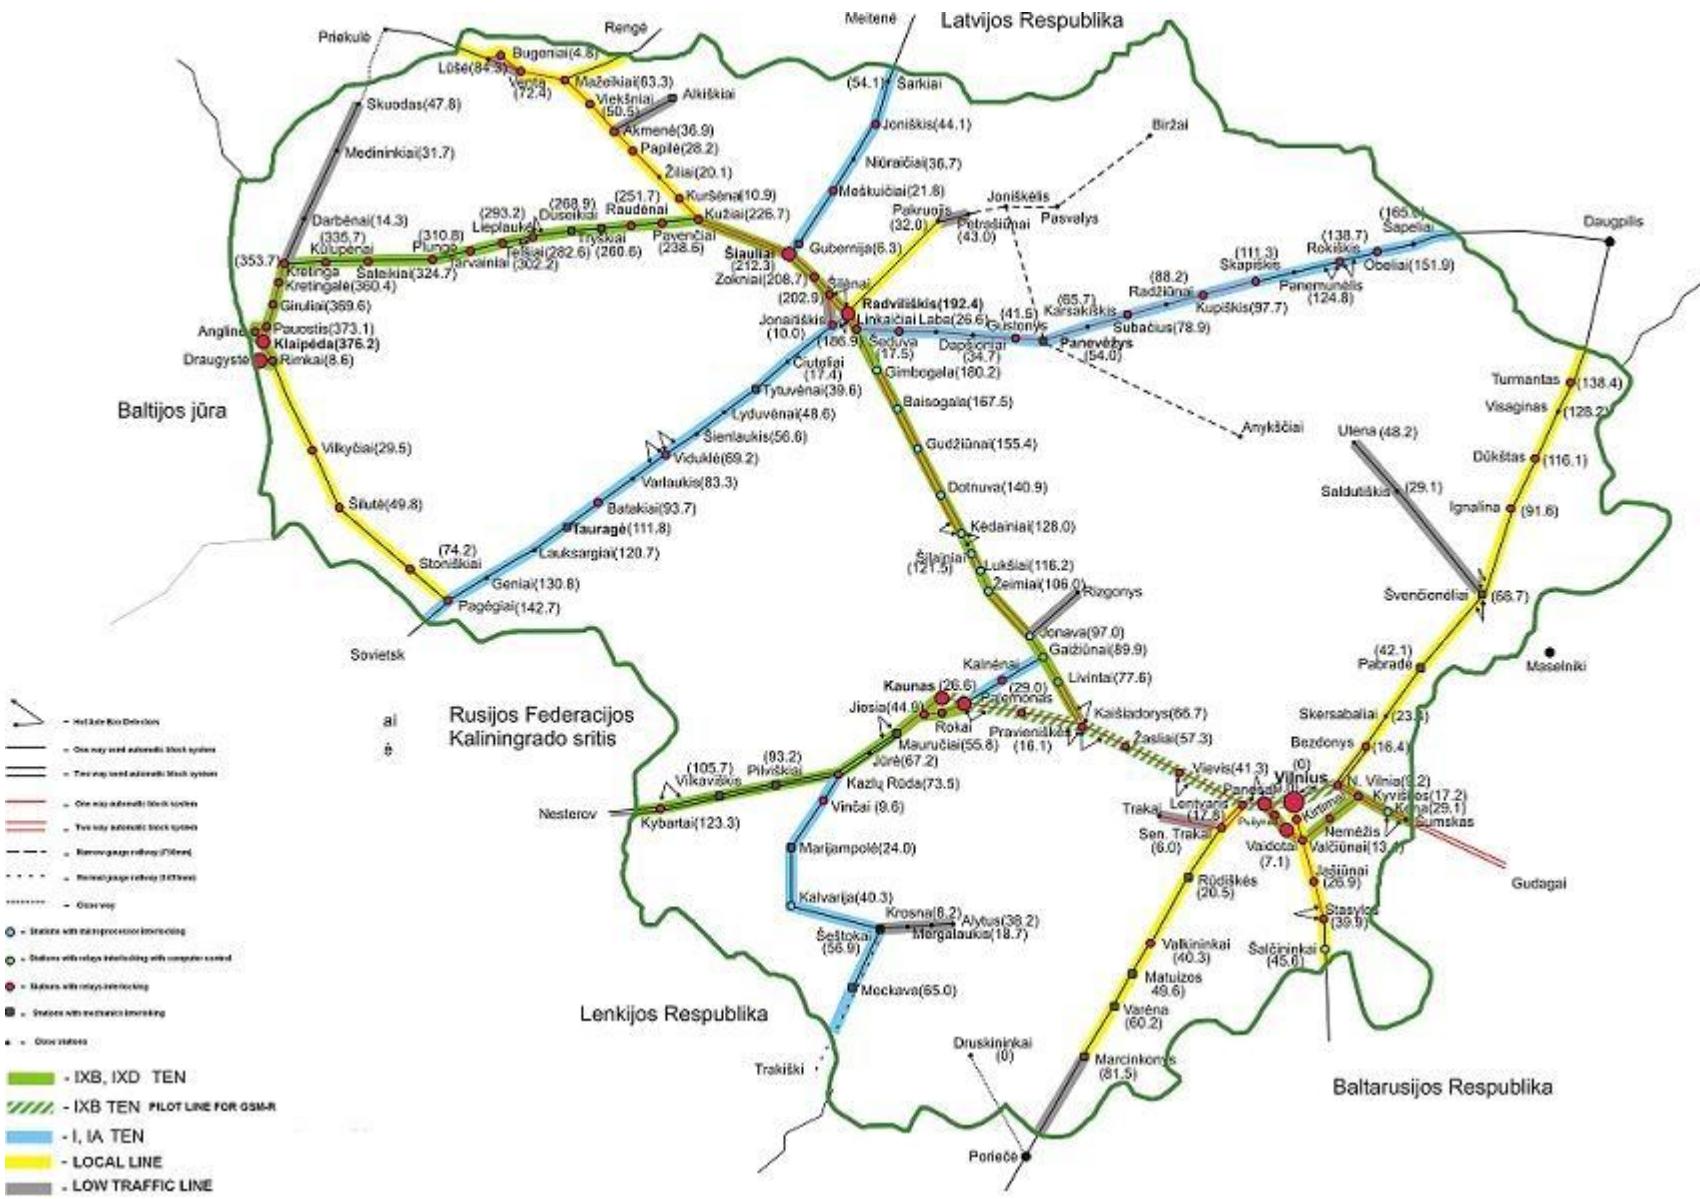

- nuolat gerinti, tobulinti saugos geležinkeliose valdymo sistemą, atsižvelgiant į ES teisės aktų ir mokslo, technikos pažangos raidą bei teikiant pirmenybę geležinkelių transporto eismo įvykių prevencijai;
- kelti geležinkelio įmonių (vežėjų) ir infrastruktūros valdytojų darbuotojų, atsakingų už eismo saugą, kvalifikaciją (nauji atestavimo reikalavimai);
- griežtinti asmenų atsakomybę už geležinkelių transporto eismo saugą reglamentuojančių teisės aktų pažeidimus ir nepakankamą eismo saugos kontrolę (Lietuvos Respublikos administracinio teisės pažeidimo kodekso pakeitimai);
- pagalba geležinkelio įmonėms (vežėjams) ir infrastruktūros valdytojams diegiant saugos valdymo sistemas;
- eismo organizavimo reglamentavimas tarp viešosios infrastruktūros valdytojo ir privažiuojamųjų geležinkelių kelių naudotojų.

The priorities of the activity of the Inspectorate in the fields of railway transport traffic safety:

- to maintain and continuously improve the management of railway safety, taking into consideration the development of EU legislation and technical and scientific progress and giving priority to the prevention of railway transport events;
- to improve the qualification of the personnel responsible for railway transport traffic safety of Railway Undertakings (operators) and Railway Infrastructure Managers (new requirements of certification of the personnel responsible for railway transport traffic safety);
- to stiffen the responsibility for violation of the requirements of railway transport traffic safety and indefeasible control of railway transport traffic safety (the amendment of the Violation of Administrative Law Code);
- help to Railway Undertakings (operators) and Railway Infrastructure Managers installing the Safety Management System;
- the regulation of railway transport traffic organization between the Public Infrastructure Manager and approaching railway roads users.

|                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Planinis patikrinimas</b> – tai patikrinimas, kuris yra suplanuotas iš anksto (laiko atžvilgiu).                                                                                                                                  | <b>Planned inspections</b> - means the inspections that are planned in the future (in the time).                                                                                                                                                                                               |
| <b>Neplaninis (netikėtas) patikrinimas</b> – patikrinimas, reikalaujantis neatidėliotinų veiksmų ir apie kurį geležinkelio įmonei (vežėjui), geležinkelio infrastruktūros valdytojui ar kitiems subjektams nėra iš anksto pranešama. | <b>Unplanned inspections</b> - means the inspections that require an immediate action and which aren't preliminary announced to the RUs, IMs and etc.                                                                                                                                          |
| <b>Mirtys (žuvęs žmogus)</b> – tai žmogus, žuvęs iš karto arba per 30 dienų dėl avarijoje patirtų sužeidimų, išskyrus savižudžius.                                                                                                   | <b>Deaths (killed person)</b> - means any person killed immediately or dying within 30 days as a result of an injury accident, excluding suicides.                                                                                                                                             |
| <b>Sužeidimai (rimtai sužeistas žmogus)</b> – tai sužeistas žmogus, kuris buvo paguldytas į ligoninę daugiau nei 24 valandoms dėl avarijoje patirtų sužeidimų, išskyrus mēginusius nusižudyti.                                       | <b>Injures (seriously injured person)</b> - means any person injured who was hospitalized for more than 24 hours as a result of an accident, excluding attempted suicides.                                                                                                                     |
| <b>Keleiviai kilometrui</b> – tai mato vienetas, išreiškiantis vieno keleivio transportavimą geležinkelį transportu vieno kilometro atstume.                                                                                         | <b>Passenger-km</b> - means the unit of measure representing the transport of one passenger by rail over a distance of one kilometer. Only the distance on the national territory of the reporting country shall be taken into account.                                                        |
| <b>Geležinkelio kelevis</b> – tai asmuo, neįskaitant geležinkelio įmonės (vežėjo) darbuotojų, kuris keliauja geležinkelio transportu. Iškaičiuojami keleiviai, norintys įlipti (išlipti) į (iš) judančio traukinio.                  | <b>Railway passenger</b> - means any person, excluding members of the train crew, who makes a trip by rail. For accident statistics, passengers trying to embark/disembark onto/from a moving train are included.                                                                              |
| <b>Savižudybė</b> – tai samoningas savęs sužalojimo veiksmas, kurio pasekmė yra mirtis.                                                                                                                                              | <b>Suicide</b> - means an act to deliberately injure oneself resulting in death, as recorded and classified by the competent national authority.                                                                                                                                               |
| <b>Traukinys</b> - suformuotas ir sukabintas vagonų sąstatas su vienu ar keliais veikiančiais lokomotyvais, taip pat važiuojantys lokomotyvai ar kiti savaeigiai riedmenys, turintys reikiamus signalus ir numerij.                  | <b>Train</b> - means a formation of railway cars coupled with one or several operating locomotives; locomotives and other self-propelled rolling stock equipped with appropriate signals and numbers.                                                                                          |
| <b>Traukiniai kilometrui</b> - tai mato vienetas, išreiškiantis traukinio judėjimą viename kilometre.                                                                                                                                | <b>Train*Km</b> - means the unit of measure representing the movement of a train over one kilometer. The distance used is the distance actually run, if available, otherwise the standard network distance between the origin and destination shall be used. Only the distance on the national |

|                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Patikrinimas</b> - atitikimo įvertinimas, atliekant apžiūrą ir vertinimą kartu su išmatavimais, tyrimais ir matų tikrinimu, sisteminis, nepriklausomas ir dokumentuotas procesas, kurio tikslas gauti patikrinimo įrodymus ir juos objektyviai įvertinti, siekiant nustatyti, kaip buvo įvykduti patikrinimo kriterijai.</p> | <p>territory of the reporting country shall be taken into account.<br/> <b>Inspection</b> - conformity evaluation by observation and judgement accompanied as appropriate by measurement, testing or gauging; systematic, independent and documented process for obtaining inspection evidence and evaluating it objectively to determine the extent to which inspection criteria are fulfilled.</p> |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Chart C.2.2. National definitions

**Geležinkelio įmonė (vežėjas)** – licencijuota įmonė, keleiviams, bagažui ir (ar) kroviniams vežti naudojanti viešąjį geležinkelį infrastruktūrą ir užtikrinanti trauką teisėtai valdomomis traukos priemonėmis, taip pat įmonė, kuri tik teikia traukos priemones.

**Geležinkelį transporto eismo įvykis** – įvykis, kai geležinkelio transporto eismo metu dėl gaivalinių nelaimių, techninių priežasčių ar nustatytų geležinkelio transporto eismo saugos reikalavimų nesilaikymo ar netinkamo laikymosi atsiranda žalingos pasekmės. Eismo įvykiai skirstomi į katastrofas, avarijas ir riktus

**Avarija** – geležinkelio transporto eismo įvykis, kai susiduria traukiniai, geležinkelio riedmenys, traukiniai su geležinkelio riedmenimis ar statiniais, įrengimais, geležinkelio riedmenys nurieda nuo bėgių, įvyksta geležinkelio transporto eismo įvykis pervažose, dėl judančių geležinkelio riedmenų sužalojami ne daugiau kaip keturi žmonės ir kyla gaisras geležinkelio transporte.

**Katastrofa** – eismo įvykis, kai dėl traukinių ir geležinkelio riedmenų susidūrimo ar traukinių ir geležinkelio riedmenų nuriedėjimo nuo bėgių, traukinių ir geležinkelio riedmenų susidūrimo su keliu transporto ar kitomis transporto priemonėmis žūva vienas ir daugiau žmonių arba sužalojami penki ir daugiau žmonių, arba padaryta ne mažesnė kaip 2 milijonų eurų žala geležinkelio infrastruktūrai, geležinkelio riedmenims, aplinkai arba fizinių ar juridinių asmenų turtui, taip pat bet kuris kitas panašus eismo įvykis, dėl kurio nebegalima kontroliuoti ir (ar) valdyti eismo saugos geležinkeliuose.

**Riktas** – eismo įvykis, kuris kilo dėl geležinkelio riedmenų ir traukinių eksplotavimo, turėjo neigiamą poveikį eismo saugos kontrolei ir valdymui eksplotavimo metu, bet nesukėlė katastrofos ir avariujos padarinių.

**Railway undertaking** - means a licensed undertaking which uses public railway infrastructure for the transport of passengers, luggage and/or goods and ensures traction by using legitimate means; this also includes undertakings which provide traction only.

**Railway transport event** – an event when during railway transport traffic harmful consequences appear due to elemental forces, technical causes or due to violation or undue observance of the established railway transport traffic safety requirements. Railway traffic events are divided into train crashes, accidents and incidents.

**Accident** – a railway transport event when collision of trains, rolling-stock, trains with rolling-stock or with erections, equipment takes place, when derailment of rolling-stock occurs, when a railway traffic event occurs in level-crossings, when rolling-stock in motion results in no more than four injured persons and fire breaks out in railway transport.

**Catastrophe** – a traffic event when collision of trains and rolling-stock or derailment of trains or rolling-stock, or collision of trains and rolling-stock with road transport or other means of transport takes place, resulting in at least one killed or five or more injured persons, or bringing damage of not less than 2 million EUR to railway infrastructure, rolling-stock, environment or property of legal or natural persons; including any other kind of traffic event due to which it is impossible to control and/or manage railway traffic safety.

**Incident** – a traffic event caused by exploitation of rolling-stock and trains, resulting in negative consequences upon control and management of traffic safety during the process of exploitation, though not bringing on train crash or accident consequences.

**Geležinkelių transporto eismo sauga** (toliau – **eismo sauga**) – geležinkelių transporto eismo būklė, kai keleiviai, kiti geležinkelių transporto eismo dalyviai ir kiti asmenys, taip pat geležinkelių infrastruktūra, geležinkelių riedmenys bei vežami kroviniai ir bagažas yra apsaugoti nuo eismo įvykių ir jų padarinių.

**Geležinkelių transporto eismas** – traukinių eismas ir manevrai (geležinkelių riedmenų judėjimas geležinkelių keliais).

**Railway transport traffic safety** (hereinafter referred to as **traffic safety**) – a condition of railway transport traffic when passengers, other railway transport traffic participants and other persons, as well as railway infrastructure, rolling-stock and cargo and baggage transported are all protected from traffic events and their consequences.

**Railway transport traffic** – train traffic and shunting (motion of rolling-stock by railway)
