Foreword

The European Union Agency for Railways has entered a new era, with a fully-fledged package of tasks, involving the continuation of the progress with safety and interoperability, while starting its role of EU-wide authority for vehicle authorisations, single safety certificates and ERTMS trackside approvals.

The following are key for the proposed multi-annual (2019-2021) and annual (2019) programming document:

- (1) The 2019-2021 programming period has a significant importance for the Agency, as it involves the **transition towards incorporating the new tasks** in addition to the regular tasks in the field of railway safety and interoperability. For several topic areas, the need to build multi-annual roadmaps has been identified in coordination with the European Commission.
- (2) While the Agency is finalising all the necessary **preparatory steps** for the new role, the transition remains marked by a degree of **uncertainty** as regards the transposition of the legal provisions by the Members States by June 2019, also considering their legal possibility to decide to transpose in June 2020.
- (3) For the Agency, this has important **consequences** in the context of the planning of its activities, human and financial resources, in particular for the years 2019 and 2020.
- (4) Success will be based upon an integrated **Plan-Do-Check-Act cycle**. The Agency has therefore set the structure of its activities and multi-annual objectives based on this cycle, with the aim of ensuring an increased effectiveness and efficiency of its work programme.
- (5) In order to balance this with possible actual variations, the Agency has designed an **agile system** of managing its work and resources, based on a prioritization process. Thus, should the actual requests for vehicle authorisations, single safety certificates and trackside approvals not be in line with the assumptions, the Agency is ready to activate a mechanism of reprioritisation.
- (6) For 2019, significant effort has been put by the Agency for prioritising its work and outputs in order to cope with a **limited budget compared to the needs**, considering the package of new tasks envisaged for the Agency compared to the past years (delivery of the 4th Railway Package; monitoring of NSAs; of NoBos; One Stop Shop, including interfaces with ERATV and ERADIS; the European Vehicle Register etc.). The proposed work programme reflects the result of the prioritisation exercise and lists all the priority outputs which fit into the budget and the human resources envelope for the year.
- (7) In addition to the 4th Railway Package related tasks, in 2019 the Agency will continue its work for the cleaning up of national technical and operational rules, will ensure the maintenance of TSIs according to prioritised needs, will further support the route compatibility check through the necessary parameters in RINF and will ensure the necessary interfaces between OSS, ERADIS and ERATV. Moreover, it will start its monitoring activities for NSAs and NoBos.
- (8) Certain valuable projects which could not fit in the resource envelope are kept in **a reserve list**, which may be activated during the year, if the intensity of requests for the 4th Railway Package tasks is lower than assumed (e.g. NIB peer review funding; preparing the CSM for assessing the safety level and the safety performance of railway operators at national and Union level - Common Occurrence Reporting; certain streams of the work in international relations; the study on 5G in the context of ERTMS; UN legal work for the European Commission; the full development of the Single Rules Database etc.).

The Agency will continue to work closely with its staff and stakeholders in order to ensure the successful implementation of this challenging multi-annual programme.

Josef Doppelbauer
Executive Director

List of acronyms

| | |
|---------|--|
| 4RP | Fourth Railway Package |
| ATO | Automatic Train Operation |
| BoA | Board of Appeal |

| KPI | Key Performance Indicator |
| MB | Management Board |
| MS | Member State |
| NIBs | National Investigation Bodies |
| NSAs | National Safety Authorities |
| NTRs | National Technical Rules |
| NVR | National Vehicle Register |
| OSJD | Organisation for Cooperation of Railways |
| OSS | One Stop Shop |
| OTIF | Organisation for International Carriage by Rail |
| PRM | Persons with reduced mobility |
| RASCOP | Rail Standardisation Coordination Platform |
| RDD | Reference Document Database |
| RFC | Rail Freight Corridors |
| RISC | Railway Interoperability and Safety Committee |
| RINF | Register of Infrastructures |
| RST | Rolling stock |
| RU | Railway Undertakings |
| SAIT | Safety Alert IT tool |
| SERA | Single European railway area |
| SMS | Safety Management System |
| UfM | Union for the Mediterranean |
| TSI | Technical Specifications for Interoperability |
| VKM | Vehicle Keeper Marking |

Mission statement

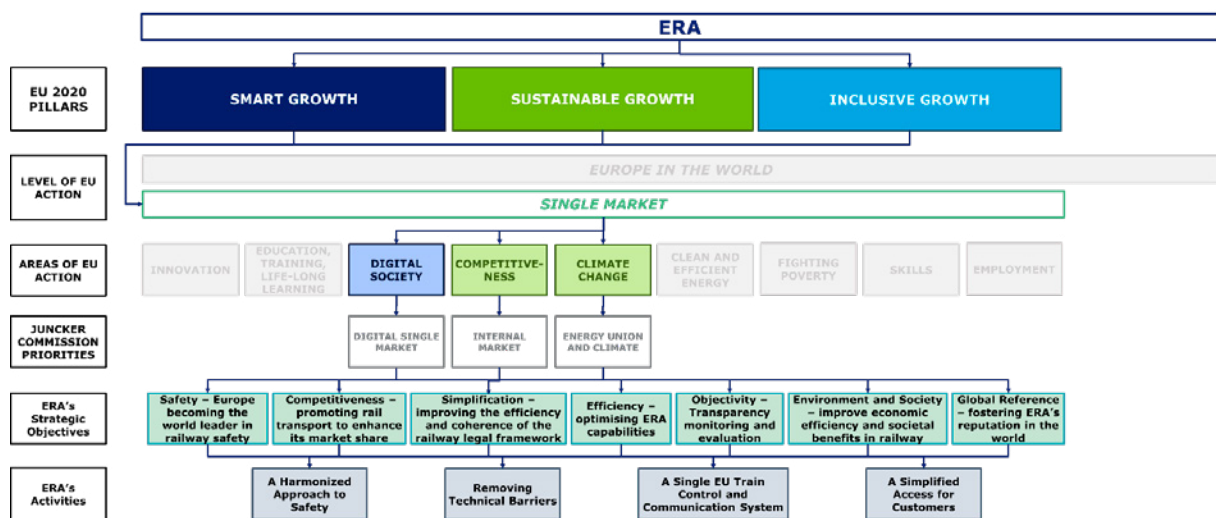

The Agency contributes to the further development and effective functioning of a single European railway area without frontiers, by guaranteeing a **high level of railway safety and interoperability**, while improving the competitive position of the railway sector, as envisaged by the **Agency Regulation 2016/796**. In particular, the Agency shall contribute, on technical matters, to the implementation of Union legislation by developing a common approach to safety on the Union rail system and by enhancing the level of interoperability on the Union rail system. Further objectives of the Agency shall be to follow the reduction of national railway rules in order to support the performance of national authorities acting in the fields of railway safety and interoperability and to promote the optimisation of procedures.

With the entry into force of the **Fourth Railway Package technical pillar**, the role of the Agency is substantially extended. As of 16 June 2019, the Agency will become the EU authority responsible for issuing authorisations for placing railway vehicles on the market, single safety certificates for railway undertakings and ERTMS trackside approvals.

Our mission is **“to make the railway system work better for society”**. To foster its mission, the Agency relies on a set of core **values** related to:

- › Stakeholder Focus
- › Ethical Values Commitment
- › Legal Compliance
- › Staff involvement and development
- › Everybody’s Commitment to Quality
- › Continuous Improvement
- › Business Continuity
- › Information Governance
- › A Culture of Sustainability

Through its mission and actions, ERA is committed and contributes to the **EU 2020 agenda** and the areas of action related to competitiveness, digital agenda and, indirectly, to the ones related to climate change, by promoting a “green” mode of transport (1).

(1) EU Agencies Study, Deloitte, November 2016

Section I — General context

Section I —

General context

The 2019-2021 programming period has a significant importance for the Agency, as it involves **the transition** towards becoming the EU-wide authority for safety certification, vehicle authorisation and ERTMS trackside approval, as foreseen in the Technical Pillar of the Fourth Railway Package, in addition to the traditional tasks in the field of railway safety and interoperability. The new legal instruments and structures envisaged to complete the technical pillar's legislative framework are now in place, most notably: the practical arrangements on vehicle authorisations, and on safety certificates, a scheme for fees and charges, a Board of Appeal and its rules of procedure, as well as the common safety methods. Moreover, the set of reviewed technical specifications for interoperability is planned to be adopted in the beginning of 2019. The One Stop Shop application is still under development and scheduled to be available in the first half of 2019.

This transition is marked by a degree of **uncertainty** as regards the transposition of the legal provisions by the Member States by June 2019, also considering their legal possibility to ask for an extended transposition by one year. This may mean varying workload for the Agency, with the probability to have limited number of applications followed by peaks of requests in the next periods. In its new role of EU-wide authority, the Agency will anyway have to be **ready** to respond within legal deadlines to the applications received for safety certificates, vehicle authorisations and ERTMS trackside approvals, while continuing its work for ensuring a high level of railway safety and interoperability in the EU. Further information will be formally available in December 2019, based on Member States' notifications to the European Commission. Based on this, the Agency will be able to refine its estimates regarding the workload, as well as regarding the expected fees and charges.

Taking into consideration the above-mentioned uncertainties, the Agency has put in place **an agile** system of managing its work and resources, based on a **prioritization process and associated contingency criteria**. For 2019, significant effort has been put by the Agency for prioritising its work and outputs in order to cope with **a limited budget compared to the needs**, considering the package of new tasks envisaged for the Agency compared to the past years (delivery of the 4th Railway Package; monitoring of NSAs; of NoBos; One Stop Shop, including interfaces with ERATV, EVR and ERADIS; the European Vehicle Register etc.). Moreover, the budget estimated for the One Stop Shop in 2019 was not approved in the financial envelope. The proposed work programme reflects the result of the prioritisation exercise and lists all the priority outputs which fit into the budget and the human resources envelope for the year.

Certain valuable projects which could not fit in the resource envelope are kept in **a reserve list**, which may be activated during the year, depending on the intensity of requests for the 4th Railway Package tasks. This may require regular revision cycles of the work programme in order to reflect the actual needs for the 4th Railway Package activities during the year and free resources, if the case, for additional outputs from the reserve list (e.g. NIB peer review funding, preparing the CSM for Common Occurrence Reporting, certain streams of the work in international relations, the study on 5G in the context of ERTMS, UN legal work for the European Commission, the full development of the Single Rules Database, of the PRM TSI Inventory of Assets and of SAIT etc.).

Moreover, in order to cope with the budget limitations, the Agency envisages a set of **solutions**, such as: providing reimbursements to participants only for the Management Board meetings and for a couple of specific cases such as the persons with reduced mobility attending the PRM TSI work; ceasing the translations for the NIB and NSA annual reports; issuing the work programme and the annual activity report only in electronic format. The Agency draws attention on the fact that in 2019 and 2020, there is the risk that not enough SSC and VA projects will have been started to cover the costs for the staff envisaged to be covered from fees and charges (9 temporary agents and 3 contract agents). In such situation, support from the European Commission will be requested to cover the budget gap.

Section 2 — Multi-annual programming 2019-2021

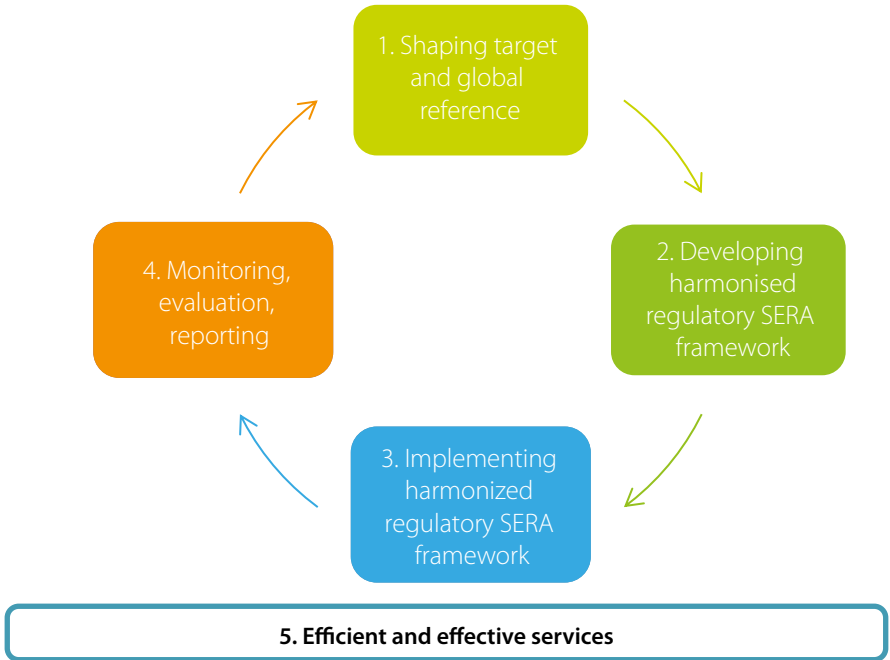

Section 2 — Multi-annual programming 2019-2021

1. Structure of the multi-annual programme 2019-2021

The new structure of Agency's multi-annual activities, organised according to the Plan-Do-Check-Act cycle, is likely to support the above-mentioned agile approach:

- › Activity 1 – Contributing to shaping target and global reference
- › Activity 2 – Developing the harmonised regulatory SERA technical framework
- › Activity 3 – Implementing the harmonised regulatory SERA framework (under 4RP)
- › Activity 4 – Monitoring, evaluating and reporting
- › Activity 5 – Delivering efficient and effective services

The Agency envisages to keep this structure of activities rather stable over the next multi-annual cycle. Such structure is primarily designed to ensure improved effectiveness and efficiency of the Agency work programme and is agnostic towards the organigram of the Agency. In fact, a matrix organisation is ensured between the organigram and the work programme structure.

Each of the 5 activities is subdivided into objectives, with a total of 23 objectives, which are also envisaged to remain stable on a multi-annual basis. The overview of the 23 SPD objectives is included in the following table.

| Activity 1 – Contributing to shaping target and global reference | | Activity 2 – Developing the harmonised regulatory SERA technical framework | | Activity 3 – Implementing the harmonised regulatory SERA technical framework (under 4RP) | | Activity 4 – Monitoring, evaluating and reporting | | Activity 5 – Delivering efficient and effective services | |
|--|--|--|--|--|--|---|---|--|---|
| 1.1 | Strengthening global cooperation in rail | 2.1 | Harmonised Railway Operations and Management Systems | 3.1 | Ensuring the coordination of the Fourth Railway Package implementation | 4.1 | Collect and analyse evidence for decision making | 5.1 | Ensure good corporate governance |
| 1.2 | Strategic Development | 2.2 | Harmonised technical specifications (fixed installations and vehicles) | 3.2 | Issuing Single Safety Certificates | 4.2 | Monitoring | 5.2 | Ensuring sound management of the Agency's human and financial resources and building facilities |
| 1.3 | Enhancing Railway Safety through positive safety culture and integration of human and organisational factors | 2.3 | Harmonised Train Control System and telematics (communications, signalling, ERTMS system authority, telematics system authority) | 3.3 | Issuing Vehicle Authorisation, including ERTMS on-board assessments | 4.3 | Identifying research needs for the Target Rail System and supporting partner organisations in research and innovation | 5.3 | Supporting business delivery through IT systems. |
| 1.4 | Implementing the EU Med Rail Project | 2.4 | Disseminating and Training to support implementation of the EU framework | 3.4 | Issuing ERTMS trackside approvals | 4.4 | Reporting on the Railway System | 5.4 | Communicating effectively through website and social media |
| 1.5 | Implementing the IPA Project | | | 3.5 | Railway System Data | | | 5.5 | Ensuring efficient and effective communication (internal and corporate) |

2. Content of the multi-annual programme 2019-2021

Activity 1 - Contributing to shaping target reference and global reference for the EU rail system

› Objective 1.1 Strengthening global cooperation in rail

For the period 2019-2021, the Agency shall support the European Commission's international strategy. For that, the Agency identified the need to set up and implement, in coordination with the EC, a roadmap for engagement in the global development of regulations and standards. The benefits of making the EU railway standards a global reference will be analysed in the context of such a multi-annual planning. Moreover, in the framework of this objective, the Agency is interested to foster a structured approach to the clarification, simplification and evolution of the existing EU railway framework (incl. common positions), in coordination with the EC. In order to cope with the budget constraints for 2019 and until the multi-annual roadmap is agreed with the EC, the Agency will limit some streams of the international work.

The Agency will continue to support the strengthening of cooperation at a European level through the work of the networks that involve partner organisations and coordination meetings with various certification bodies. The Agency will support the use of the Joint Network Secretariat as a mechanism to allow the interested parties to find the best solution.

› Objective 1.2 Strategic Development

The Agency, together with the European Commission, have identified the need for building multi-annual roadmaps on several topics, including but not limited to: global cooperation; further improvement of the railway technical system specifications, based on identified needs and issues, including the coordination between the TSIs revisions cycle and the standards revision cycle; the strategic coordination with the EC and Shift2Rail in the field of research and innovation; railway data and information management etc. These roadmaps are likely to strengthen the multi-annual view from the incoming programming documents of the Agency.

The Agency will contribute to requests of the EC in the development of the strategic programming of new areas/interventions, taking into account the upcoming challenges (e.g. multimodality, digitalization incl. the expected migration from trackside functions towards on-board functions).

› Objective 1.3 Enhancing Railway Safety through positive safety culture and integration of human and organisational factors

In order to continuously improve railway safety across Europe in a smart way, there is a need to consider both rules-based and behaviour-based safety. Promoting the integration of human and organisational factors expertise early in the design stage is key, to systematically share lessons learned from accidents and to develop a just culture. In coming years all players will need to understand and adapt to new responsibilities, in particular linked to the gradual automation of human functions and its associated risks. To achieve this "smart safety" though there needs to be a sound understanding of risk management, the proper deployment of safety management systems and sound data to allow for better informed decision making. Due to budget constraints in 2019, the Agency will address the use of safety operational data, including COR, as part of a multi-annual roadmap.

› Objective 1.4 Implementing the EUMedRail Project and 1.5 Implementing the IPA Project

The Agency will continue with both the long-standing IPA initiative to support safe and interoperable railway transport in and between the Accession States and the EUMEDRail project financed by DG NEAR to support safe and interoperable railway transport in and between the EC neighbourhood of the South Mediterranean region.

Activity 2 - Developing the harmonised regulatory SERA technical framework

› **Objective 2.1 Harmonised Railway Operations and Management Systems**

The removal of existing operational barriers will focus on avoiding time losses at cross-border sections caused by different national operating and safety rules, and on further reducing training costs for cross-border operating staff by optimising the operational communication and processes, including the work on the issues log of the Railway Freight Corridors.

The Agency will continue to contribute to the risk management stream of work, including the risk assessment methodologies for the transport of dangerous goods, as well as to the stream of work on inspection, maintenance and repair of rolling stock through an accreditation scheme for ECMs. The future work on ECMs will be led by the final text of the ECM Regulation.

› **Objective 2.2 Harmonised Technical Specifications (fixed installations and vehicles)**

Overall, the Agency acts as the reference point for all EU railway technical specifications (in partnership with EU standardisation organisations) and is becoming the reference point for EU-wide authorisation processes of railway vehicles. With a substantial package of TSIs revisions planned for January 2019, targeted at ensuring the consistency with the provisions of the 4th Railway Package, the TSIs are entering an era of stability. The maintenance of the TSIs will be governed through the change control management process, which will also entail a prioritization of the change requests, depending on the magnitude of the issues to be solved and the added value for the stakeholders.

The focus on the cleaning up of the national technical rules, in particular of the vehicle-related ones, but also those for fixed installations which risk to detrimentally impact the successful implementation of the 4th Railway Package, remains key for the Agency.

› **Objective 2.3 Harmonised Train Control System and telematics (communications, signalling, ERTMS system authority, telematics system authority)**

The Agency will continue to support with its technical expertise the implementation of the relevant steps from the EC Staff Working Document “Delivering an effective and interoperable ERTMS – the way ahead”, while relying on the commitments from the Memorandum of Understanding on ERTMS (2016) and benefiting from the support of the ERTMS Platform stakeholders. The benefits from the identified game changers (ATO, L3, braking performance, security, etc.) will be leveraged respecting the key principles of compatibility and protection of investments.

In the field of railway communications, the Agency will develop the roadmap enabling ETCS communications on IP based radio technologies, and on the consolidation of the requirements for the evolution of voice radio in view of the planned GSM-R life expectancy, aiming at the definition of the new radio communication systems which includes a functional, technology, spectrum and migration work stream.

The TSIs on telematics applications (TAP and TAF TSIs) are addressing issues related to railway customers, aiming at harmonizing the exchange of information between actors.

› **Objective 2.4 Disseminating and Training to support implementation of the EU framework**

The main expected outcome is to support the harmonized implementation of the EU framework and to strengthen the level of awareness through dissemination and training activities. With the significant changes brought by the 4th Railway Package, there will be a need to disseminate the requirements and processes linked to Safety Certification and Vehicle Authorisation. Experience from previous legislative changes indicates that this dissemination framework will need to continue for a number of years to ensure it is widely understood and applied. To this end, the Agency will start in 2019 the setting up of the ERA Academy for dissemination and training purposes.

Activity 3 - Implementing the harmonised regulatory SERA technical framework (under 4RP)

› **Objective 3.1 Ensuring the coordination of the Fourth Railway Package implementation**

Conforming to the technical pillar of the Fourth Railway Package, the Agency will be the sole body responsible for issuing multi-Member State vehicle authorisations and safety certificates across the whole EU and approving ERTMS trackside. The new legal instruments and structures envisaged to complete the technical pillar's legislative framework are now in place, most notably: the practical arrangements on vehicle authorisations, on safety certificates, the recommendation on ERTMS trackside approval, a scheme for fees and charges, a Board of Appeal and its rules of procedure, as well as the common safety methods. Moreover, the set of reviewed technical specifications for interoperability is planned to be adopted in the beginning of 2019. The One Stop Shop application is still under development and scheduled to be available in the first half of 2019.

For 2019, this will focus on delivering the technical programme for SSC and VA Training (first round of training modules, while the following rounds of training will be transferred to the ERA Academy); the continuation of learning cases; the negotiation of the cooperation agreements with the NSAs; the finalization of OSS development; the establishment of the Board of Appeal and the setting up of the business helpdesk. Once the preparation phase is closed in 2019, this objective will ensure the effective maintenance of the necessary processes and tool for the delivery of the 4th Railway Package Tasks (revision of guides and procedures; OSS releases, business helpdesk).

› **Objective 3.2 Issuing Single Safety Certificates**

The Agency will issue Single Safety Certificates from 16 June 2019, as part of its role of EU-wide authority, enforced by the 4th Railway Package. Single Safety Certificates will be managed using the Agency's One Stop Shop IT system.

› **Objective 3.3 Issuing Vehicle Authorisations, including ERTMS on-board assessments**

With the Fourth Railway Package in force, the Agency will issue all multi-Member State vehicle authorisations and, on request from applicants, national vehicle authorisations. All vehicle authorisations will be managed using the Agency's One Stop Shop IT system.

› **Objective 3.4 Issuing ERTMS trackside approvals**

The Agency is the system authority for the harmonised ERTMS specifications and for their coherent implementation in the railway system. Its role in vehicle authorisation and ERTMS trackside approval allows a strengthened leadership in the efficient application of the framework and of the standards.

Common remark for Objectives 3.2-3.3-3.4: The uncertainty related to the rate of transposition in 2019 and 2020, respectively, and therefore the unpredictable number and complexity of applications raises the need for ERA to have an agile work programme and allocation of resources.

› **Objective 3.5 Railway system data**

The Agency strives, with a multi-annual perspective, for providing timely and quality data for identified use cases (internal and external) e.g. to facilitate route compatibility testing, authorization processes, planning and operational purposes and to monitor the implementation of SERA. In 2019 particular attention will be given to updating RINF in accordance to specifications for route compatibility check, updating ERATV for alignment with 4RP requirements, ensuring the OSS –ERADIS interface for SSC and enabling the new ECM certificate structure in ERADIS. The Single Rules Database will be addressed in a multi-annual perspective, given the limited resources for 2019. Depending on the availability of resources, the work on the PRM TSI Inventory of Assets (IoA) may continue.

Activity 4 - Monitoring, evaluating and reporting

› **Objective 4.1 Collect and analyse evidence for decision making**

The Agency carries out economic evaluations (ex-ante impact assessment, ex-post evaluations) as a feature common to all activities of the Agency in order to avoid any decrease of the competitiveness of railway transportation, and in order to provide decision-makers with a fair estimate of the effects of Agency recommendations.

› **Objective 4.2 Monitoring**

The Agency's monitoring activities are aimed at contributing to improving overall EU safety and interoperability by increasing quality of and the trust in the work performed by NSAs, NIBs, NoBos and recognised assessment bodies for an effective and efficient implementation of the 4RP provisions. Following the piloting of the scheme to monitor National Safety Authorities in 2018, the years 2019 – 2021 will see the scheme running at full operation. However, due to limited budgetary resources in 2019, the Agency asks the Management Board to endorse a targeted monitoring activity for the NSAs, focused on the priority needs from the perspective of the 4th Railway Package (supervision and competence management framework).

In order to increase the trust in the work performed by NoBos and in the certification procedure as a whole, the Agency has already developed a set of harmonised requirements for conformity assessment bodies (applicable within both accreditation and recognition environment) and a proposal for an EU harmonised monitoring system for notified conformity assessment bodies, which will start to be implemented in 2019.

The Agency will perform qualitative analyses of the NIB accident investigation reports in order to extract meaningful conclusions. To the extent to which the limited resources allow, the Agency will continue to take part, as observer, to the peer review activities for NIBs and CSM Risk Assessment Recognition bodies. However, for 2019, due to the budget constraints, the Agency will not be able to fund the NIB peer review.

› **Objective 4.3 Identifying research needs for the target rail system and supporting the partner organisations in research and innovation**

The Agency contributes to railway research activities at the Commission's request or on its own initiative. It supports the Commission services, representative bodies and the Shift2Rail Joint Undertaking with railway expertise and contributes to the definition and implementation of the Shift2Rail Master Plan by: proposing possible amendments to the Shift2Rail Master Plan and to the annual work plans, in particular to ensure that research needs relating to the realisation of the Single European Railway Area are covered; proposing, after consultation with the stakeholders, guidelines for research and development activities leading to technical standards with a view to guaranteeing the interoperability and safety of results; reviewing the common developments for the future system and contributing to defining target systems in regulatory requirements, and reviewing project activities and results with a view to ascertaining their relevance to the Shift2Rail general objectives and to guaranteeing the interoperability and safety of research results.

› **Objective 4.4 Reporting on the Railway System**

The Agency is monitoring the progress on railway interoperability and safety. Priority in 2019 will be given to providing an annual overview for the Report in Railway Interoperability and Safety (to be issued in 2020) and the annual assessment of achievement of safety targets (CSTs assessment report). In a multi-annual perspective, the Agency will explore the requirements for a tool that can provide an overview of the safety and interoperability level of the Union rail system in accordance with Article 35(6) of the Agency Regulation. Moreover, the multi-annual planning can also incorporate the further development of the Railway System Data Inventory.

Activity 5 - Delivering efficient and effective services

› **Objective 5.1 Ensure good corporate governance**

This activity covers overall corporate governance including: the Agency's legal and accounting activities, the internal control coordination and ethics function, the business planning and reporting, the support for the Management and Executive Board, the process-based Integrated Management System (ISO 9001:2015 certified in June 2017) supporting Agency's operations while maintaining quality standards, as well as the information security activities.

› **Objective 5.2 Ensuring sound management of the Agency's human and financial resources and building facilities**

The main focus of the specific objective is to ensure an effective management of the Agency's needs linked to the additional tasks of the Fourth Railway Package and its impact on human and financial resources and building facilities.

› **Objective 5.3 Supporting business delivery through IT-systems**

The Agency will continue to develop and maintain core business applications and infrastructures for the benefit of the Agency's stakeholders. It also ensures ICT business continuity, disaster recovery and support to users of systems and services.

› **Objective 5.4 Communicating effectively through website and social media**

The Agency has updated its website in 2018 and will continue to maintain its website and develop further its social media means. The need to consolidate our presence on the web, by stabilizing and improving the new website (and contents) and increase our social media participation become increasingly important.

To all this, a proper management of the stakeholders (via the SRM tool) can contribute by increasing the number of website visitors.

› **Objective 5.5 Ensuring efficient and effective communication (internal and corporate)**

The Agency will develop the necessary communication management linked to the implementation of the 4th Railway Package and continue to organise the necessary conferences for its main activities (e.g. CCRCC Conference). The Agency has limited its communication to fit into the budget constraints in 2019.

3. Resources outlook 2019-2021

The following tables give a high level overview of the resource needs (financial resources and human resources) for the period 2019-2020.

The details are included in Annexes 1, 2 and 3 to the present document.

The budget figures in the following table are indicative until the budget will be formally adopted by the Budget Authority.

| | 2019 | 2020 | 2021 |
|---------------------|------------|------------|------------|
| Expenditure* | 27,139,347 | 28,139,347 | 28,139,347 |
| EU contribution** | 26,500,000 | 27,489,347 | 27,489,347 |
| EFTA contribution | 639,347 | 650,000 | 650,000 |
| Fees and charges*** | pm | pm | pm |
| FTEs | 190 | 188 | 188 |
| TAs | 148 | 148 | 148 |
| CAs**** | 38 | 36 | 36 |
| SNEs | 4 | 4 | 4 |

* The Agency draws attention that the cost of the activities created under the 4th Railway Package were not properly factored in the MFF. In order to cover this expenditure, the Agency will deprioritise other categories of expenditure in 2019. For 2020 and 2021, it is crucial that this amount be covered in the budget.

** The amount for 2020 is higher than the one envisaged. This is needed to cover the maintenance costs for OSS, as well as the costs for the entire package of new tasks compared to the past (NSA monitoring, NoBo monitoring, EVR, interface OSS-ERADIS, OSS-EVR and OSS-ERATV etc.). In 2019 an effort was made to fit in the envelope of the EU contribution of 26.5 mill € by deprioritizing some of the other expenditure. This effort is not sustainable for 2020.

*** Given the uncertainty on transposition by Member States in 2019 and 2020, respectively, as well as the uncertainty as regards the volume and timing of work for VA, SSC and ERTMS trackside approval requests, the Agency is not in the position to give an estimate of the revenues, expenditure and associated inflows/outflows related to the fees and charges activities. The Agency is at this stage asking the MB to agree for Title 4 to be created in the budget, while the actual revenues, expenditure and cash flow figures, included any support needed from EC, will be brought to attention later in 2019, once sufficient data is available.

**** The Agency would like to preserve a number of 38 CAs to ensure the stability of its workforce as of 2020. The Agency may come back during 2019 for requesting 2 additional CAs for 2020 onwards, which are needed. A thorough justification will be provided together with the request.

Section 3 —
Annual Work
programme 2019

Section 3 — Annual Work programme 2019

As indicated in the multi-annual program, 2019 is the transition year when the Agency will have moved towards becoming the EU-wide authority for safety certification, vehicle authorisation and ERTMS trackside approval, as foreseen in the Technical Pillar of the Fourth Railway Package. With the 4th Railway Package preparation getting to an end in 2019 and the actual delivery starting, the Agency intends to create a climate of stability for its activities and thus the structure of the annual work programme follows the 5 activities and the 23 objectives described in the multi-annual structure.

The Agency has implemented in 2018 a re-organisation in which new teams are created for the achievement of the 5 activities and the 23 underlying objectives. The structure of the work programme is agnostic to the organigram, therefore resulting in a matrix structure aimed at increasing the effectiveness and efficiency of the Agency's activities.

In **Activity 1**, in 2019 there will be a focus on defining the strategic direction for the Agency focusing on how to strengthen the EU framework outside the EU and prepare roadmaps for new upcoming strategic challenges (e.g. multi-modality, digitalisation and migration of trackside functions towards on-board functions). These roadmaps shall be built in close cooperation with the EC. In parallel, the ongoing activities shall be maintained for the coordination of networks and implementation of the IPA and EU MedRail project.

In **Activity 2**, in 2019 the necessary revisions of the TSIs linked to the 4th Railway Package are expected to be voted beginning of 2019, after which a period of stability of TSIs is envisaged. The first year after these revisions shall mainly be dedicated to identify the priorities and establishing of a multi-annual planning for potential future revisions, including the correlation between the TSIs revision cycle and the standards revision cycle. In parallel, a strong focus shall be maintained on the cleaning up of the remaining national technical and safety rules which are the main contributor for the achievement of the SERA.

In **Activity 3**, the Agency will start in 2019 to issue single safety certificates, vehicle authorisations and trackside approvals. In parallel, the Agency shall release and maintain the One Stop Shop (OSS) and upgrade the other registers according the needs with a priority towards the implementation of the requirements linked to route compatibility checks (RINF and rolling stocks registers).

In **Activity 4**, the Agency shall implement in 2019 the NSA-monitoring scheme and maintain its activities on accident/incident analysis and NIB reporting. The analysis tasks linked to impact assessment of recommendations and opinions shall be maintained and an additional analysis shall be made on the registers in order to define the potential future options to optimise the business value of the existing registers. The research activities shall continue to focus on the identification of research needs linked to the SERA needs and the management of the integration and follow-up of these needs within the relevant research programmes (mainly linked to the cooperation with Shift2Rail).

In **Activity 5**, the Agency shall implement the necessary changes in order to continue the delivery of efficient and effective services towards its external and internal stakeholders.

The annual work programme 2019 is organised in a standard structure displaying, for each of the 23 objectives: the outcomes (added value of the objective, including the link to the multi-annual view); the main pre-conditions for achieving the outcome; the resource envelope for the year (FTE and budget); the intended outputs for 2019, together with indicators and realistic targets. This information will support the prioritisation process needed in 2019, described in detail under the General context section. The budget per SPD objective is an estimate based on the tasks envisaged and should not be read as a precise measure.

The budget figures quoted in each of the following fiches refer to direct costs under Title 3 - Chapter 30 of the budget. They are recapped in a separate column under Annex I, Table 2 (page 44).

All indirect costs, namely Title 1, Title 2 and Title 3 – Chapter 31 of the budget, are not recorded in the individual fiches. They are however recorded and distributed proportionally per activity under the indirect costs in Annex I, Table 2 (page 44).

The following table lists the main Key Performance Indicators (KPIs) for 2019:

| Key Performance Indicators 2019 | |
|---------------------------------|--|
| 1 | 100% decisions taken according to the legal framework deadlines for issuing SSC (for completeness and assessment phases) |
| 2 | 100% decisions taken according to the legal framework deadlines for issuing VA (for completeness and assessment phases) |
| 3 | 100% decisions taken according to the legal framework deadlines for issuing Trackside approvals (for completeness and assessment phases) |
| 4 | 95% of the recommendations and opinions issued within the legal deadlines |
| 5 | 100% Member States having their vehicle-related NTRs cleaned up |
| 6 | Positive surveillance audit on ISO 9001 certification for the Agency |
| 7 | 98% implementation of the establishment plan |
| 8 | Less than 5% of staff turnover |
| 9 | 98 % of the annual appropriations committed |
| 10 | Carry-over of <10% of payment appropriations for Title 1, <20% for Title 2, and <30% for Title 3 |
| 11 | 95% execution of carry over payment appropriations |
| 12 | 95% payments made by contractual deadline |
| 13 | 98% availability of the core ICT systems |

1. Activity 1

Contributing to shaping target and global reference

Objective 1.1

Strengthening global cooperation in rail

| | |
|--|--|
| Expected outcome | Effective EU railway framework Strengthen the EU railway framework as the global reference Continued engagement and coordination with the stakeholders |
| Outcome indicator | EU railway framework effectiveness Number of Member States outside EU implementing (partially or totally) the EU railway framework |
| Pre-conditions for achieving the outcome | Readiness to cooperate internationally Agreement with EC on the relevant roadmaps |
| Progress towards outcome in 2019 | Setting up the envisaged roadmaps and starting implementation accordingly |
| Expected resource envelope > Human resources > Financial resources | 5,75 FTE 218.49 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|---|-----------------------------------|
| Coordination of the international relations based on Roadmap for engagement in the global development of regulations and standards | Report on priority needs according to roadmap for global development addressed within international relations (support to EC on international relations; ISO/IEC/ITU; OTIF; OSJD; workshops with supervisory authorities, international organisations and administrations of third countries) | Delivered to the Management Board |
| Coordination of SERA needs with external stakeholders | Report on priority needs for EU railway framework addressed within European and international organisations > CEN/CENELEC/ETSI (alignment of standards with EU regulation, incl. RASCOP) > Support of EC regarding standards > NSA Network > NIB and NRB management and coordination > UIC cooperation | Delivered to the Management Board |

Objective 1.2 Strategic development

| | |
|--|--|
| Expected outcome | Agency's strategic planning responding to legal requirements, as well as to emerging problems and opportunities within the transport/ railway sector |
| Outcome indicator | Fit for purpose multi-annual programmes (External stakeholders' positive assessment) |
| Pre-conditions for achieving the outcome | Regular coordination with the external stakeholders on the strategic agenda topics, including the EC |
| Progress towards outcome in 2019 | Develop multi-annual roadmaps for identified priority topics in line with agreed priorities |
| Expected resource envelope > Human resources > Financial resources | 4 FTE 9.26 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|------------------------------------|---|-----------------------------------|
| Agency's strategic development | Number of multi-annual roadmaps developed for priority topics from the programming document | At least 3*, published on website |
| | No. of intermediate strategic planning reports issued for new emerging topics | 1** |

* Proposals of topics for multi-annual roadmaps subject to confirmation of priorities: global cooperation; single vision of target rail system; improvement of the railway technical system specifications, based on identified needs and issues, including the coordination between the TSIs revisions cycle and the standards revision cycle; railway data and information management, including the use of databases and registers etc.

** Proposals of topics subject to confirmation of priorities: digitalization; multimodality; migration from trackside functions towards on-board functions.

Objective 1.3

Enhancing Railway Safety through positive safety culture and integration of human and organisational factors

| | |
|--|---|
| Expected outcome | Improved safety and overall performance of the railway system through positive safety culture, integration of human and organisational factors and the cultivation of a continuous learning environment. |
| Outcome indicator | The degree of understanding of all players in the railway system of how human and organisational factors (incl. safety culture) are influencing operational performance. Safety Culture evaluation possible from 2022 (to be published from 2024 onwards based on developed methodology) |
| Pre-conditions for achieving the outcome | Cooperation of the railway sector (EC, national authorities, duty holders, etc.) |
| Progress towards outcome in 2019 | An increased understanding of HOF, safety culture and organisational learning, as well as the development of practical tools that help to support their integration. |
| Expected resource envelope > Human resources > Financial resources | 8,1 FTE 77.36 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|---|--|
| Integrate human and organisational factors | % of topics analysed by a task force / topics proposed by the network and accepted | 100% coverage according to 2018 approved planning |
| | Report on analysis of potential risks in automation, in particular impact on train drivers skills from ATO | Delivered |
| | No. sector HOF experts reached through virtual network | Min. 20 active participants |
| Develop safety culture | No. of National/Regional Safety Culture Declaration Signing Events in cooperation with NSAs and/or IMs | 2-3 |
| | European Safety Culture Model and assessment method V2 of European Railway Safety Culture Model (review of V1 based on pilots) Model tested (at IMs and RUs; at NSAs) Guide of safety culture assessment Guide of safety culture oversight | Released V2 test report published Published Published |
| | European Safety Culture evaluation process | Developed |
| | | |

Objective 1.4 Implementing the EU MedRail project

| | |
|--|---|
| Expected outcome | Technical Assistance in railways with a view on further developing an integrated, safe and efficient transport system in the South Mediterranean Region Alignment of railway regulations in the Southern Mediterranean Neighborhood with EU regulations Improvement of safe railway transport and services in and between the beneficiaries |
| Outcome indicator | Number of NSA and NIBs set up in the region Number of regulations of beneficiaries aligned with European regulations |
| Pre-conditions for achieving the outcome | Readiness to cooperate internationally Available resources at EU side |
| Progress towards outcome in 2019 | In accordance to the grant agreement for 2019 |
| Expected resource envelope > Human resources > Financial resources | 3 FTE EU grant |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|--|-----------------|
| Workshops | No. of national workshops involving one beneficiary | 6 |
| | No. of regional workshops involving more than one beneficiary | 2 |
| | No. of international workshops including EUMEDRAIL annual conference | 4 |
| Traineeship arrangements for experts of the region | No. of trainees from the beneficiaries at the Agency | 9 |
| Technical visits | No. of technical visits for specified subjects in Europe | 2 |
| | No. of technical (field) visits in the region | 5 |
| Experts participation to meetings organized by the Agency | No. of meetings/events organized by the Agency, where the experts from the region attend | 2 |
| Support to DG NEAR / UfM | No. of UfM working group meetings attended | 3 |
| | Evaluation of UfM documents related to rail transport | Performed |

Objective 1.5 Implementing the IPA project

| | |
|--|--|
| Expected outcome | Adaptation of national legislation to EU regulations in the pre-accession countries addressed Support to NSAs and NIBs from the countries addressed according to EU legal framework |
| Outcome indicator | Number of NSAs and NIBs set up in the region % of rail related legal acts aligned with EU legal framework |
| Pre-conditions for achieving the outcome | Readiness to cooperate internationally Available resources at EU side |
| Progress towards outcome in 2019 | In accordance to the grant agreement for 2019 |
| Expected resource envelope > Human resources > Financial resources | 1 FTE EU grant |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|--|-----------------|
| Workshops | No of IPA workshops with beneficiaries of Western Balkans | 4 |
| Sharing best practices among beneficiaries of the Western Balkans via peer review | No. of peer review activities | 2 |
| Experts participation to meetings organized by the Agency | No. of meetings/events organized by the Agency, where the IPA beneficiaries attended | 4 |
| Traineeship arrangements for IPA beneficiaries | No. of trainees from the IPA beneficiaries at the Agency | 2 |
| Support to the beneficiaries on request | No. of requests addressed | 2 |
| IPA report and support to EC | IPA report | Issued |
| | No. of days/month support to EC | 0.5 |

2. Activity 2

Developing the harmonised regulatory SERA technical framework

Objective 2.1

Harmonised Railway Operations and Management Systems

| | |
|--|---|
| Expected outcome | Improved operational safety and overall operational performance of the railway system through the management of major railway operational risks |
| Outcome indicator | Degree of harmonisation of railway operations and management systems throughout Europe |
| Pre-conditions for achieving the outcome | Cooperation of the railway sector (EC, national authorities, duty holders, etc.) |
| Progress towards outcome in 2019 | Progress with OPE TSI revision, removing operational barriers for RFCs, follow up on risk management for transport of dangerous goods, ECM accreditation scheme |
| Expected resource envelope > Human resources > Financial resources | 7.25 FTE 51.78 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|--|--|
| Operational rules | Recommendation for OPE TSI | Delivered |
| | Proposals of solutions for priority issues from the issues log in the context of contribution to RFC activities: 1. Train composition 2. Technical checks 3. Train Braking | Solutions discussed with RFC and published |
| | Areas for further harmonisation and identification of national operating rules (by standards or by TSI requirements depending on the outcome of the TSI OPE text) | Identified as part of a multi-annual roadmap |
| Risk management | Progress report on Transport of Dangerous Goods (TDG) risk assessment road map: ##workshop organised on guide for risk assessment in Transport of dangerous goods; ##examples of application published ##survey for monitoring the use of risk assessment methodologies | Published |
| Inspection, maintenance and repair of rolling stock - ECM certification | ECM accreditation scheme approved by EC and EA (European co-operation of Accreditation Bodies) | Implementing act voted ECM guidelines published |

Objective 2.2 Harmonised technical specifications (fixed installations and vehicles)

| | |
|--|--|
| Expected outcome | Removing technical barriers and opening the market for railway products through a Single European Railway Area |
| Outcome indicator | Evolution of the no. of applicable national technical rules (NTRs) Non-application of vehicles related TSIs Trackside infrastructure conforming to TSIs (via RINF) |
| Pre-conditions for achieving the outcome | Cooperation from MSs on cleaning up NTRs |
| Progress towards outcome in 2019 | Maintenance of TSIs that includes closing of urgent open points, alignment with European standards, alignment with reduction on NTRs, specific cases, TSI consistency Cleaning up of National Technical Rules |
| Expected resource envelope > Human resources > Financial resources | ##11 FTE ##116.67 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--------------------------------------|--|--|
| Fixed Installations TSIs maintenance | CCM process | CCM process operational |
| | Prioritization of the change requests (CRs) by the Core Team (including open points) | 90% of CRs prioritised |
| Rolling Stock TSIs maintenance | CCM process | CCM process operational |
| | Prioritization of the change requests (CRs) by the Core Team (including open points) | 90% of CRs prioritised |
| National Technical Rules management | No of MSs having their NTRs cleaned Implementing Act for cross-acceptance of NTRs, including procedures on how to cover the rules not agreed by ERA | Achieved in all MS for vehicles Delivered to EC |

Objective 2.3 Harmonised Train Control System and telematics (communications, signalling, ERTMS system authority, telematics system authority)

| | |
|--|--|
| Expected outcome | Contribute to the EU harmonized implementation of train control systems and telematics, as part of the digitalization agenda for railways: ##Coherent deployment of the ERTMS and Automatic Train Operation to increase savings in implementation cost, operation cost and the environmental footprint. ##Integrated ticketing and multi-modal travel information and reservation systems. ##Exchange of wagons, combined or multi-modal transport, the development of the rail freight corridors, taking into account the evolution of technological elements and innovation programs. |
| Outcome indicator | Core network equipped with ETCS and GSM-R; Maturity of ETCS specifications; Proportion of Telematics TSI functions implemented compared to the Masterplan |
| Pre-conditions for achieving the outcome | ##Effective collaboration with the railway sector; S2R;GSA, standardisation bodies; ##Usable deliverables from S2R; ##Effective collaboration with the TAP Governance body to accelerate the implementation of the TAP TSI. |
| Progress towards outcome in 2019 | Manage Radio Communication evolution, handle change requests for CCS TSI, manage the evolution of TAF/TAP TSIs |
| Expected resource envelope > Human resources > Financial resources | ##13.3 FTE ##72.1 K€ |
| Fee-based | No, except for the issuing of advice on ERTMS compatibility (art 30 of Agency Regulation) |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|---|-----------------|
| Manage Radio Communication evolution | Intermediate report on general definition of new radio communication system | Issued |
| Manage ERTMS long term evolution | ERTMS Opinion service pack 2 for handling of Change Requests | Issued |
| Manage the evolution of Telematics application for passengers (TAP TSI) | Revision of TAP TSI (to facilitate-ticketing and multi-modal travel). | Issued |
| Manage the evolution of Telematics application for freight (TAF TSI) | Intermediate report on the revision of TAF TSI (to facilitate better access to tracking data for customers and the development of the rail freight corridors, combined or multi-modal transport). | Issued |

Objective 2.4 Disseminating and Training to support implementation of the EU framework

| | |
|--|---|
| Expected outcome | Establishment of a training platform based on online and physical dissemination and training activities. This platform goes under the name of ERA Academy. The main objective is to support the harmonised implementation of the EU framework and to strengthen the level of awareness through dissemination and training activities. |
| Outcome indicator | Degree of awareness of the EU framework, with a focus on the 4RP. Decreasing number of issues identified in the monitoring activities based on improved knowledge e.g. implementation of CSMs, TSIs, etc. |
| Pre-conditions for achieving the outcome | Availability of specific expertise and budget |
| Progress towards outcome in 2019 | Content production and the delivery for the identified training and dissemination needs; start of the process for setting up the ERA Academy. For 2019, the main focus will be on the implementation of the 4RP. |
| Expected resource envelope > Human resources > Financial resources | ##6.6 FTE ##82.92 K€ |
| Fee-based | Not for 2019. At cruise speed, the activity can be fee based. The nature and extent of the fee based will be defined in accordance with Art. 43 of the Agency Regulation. |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|---|-----------------|
| Creating the ERA Academy | Terms of Reference, project plan and specifications for the e-learning portal | Issued |
| Creating content for internal and external training and dissemination, according to priorities | Content for the 2019 priorities including at least 4RP (OSS, SSC, VA) (training modules and dissemination activities) | Developed |
| Delivering internal and external training and dissemination | Training modules and dissemination activities according to 2019 priorities | Delivered |

3. Activity 3 Implementing the harmonised regulatory SERA technical framework (under 4 RP)

Objective 3.1 Ensuring the coordination of the Fourth Railway Package implementation

| | |
|--|--|
| Expected outcome | Optimized processes and tool to deliver SSC, VA and ERTMS Trackside approval |
| Outcome indicator | Time to propose and communicate the solution for all major changes affecting the quality of an outcome of a process or a procedure managed by the Planning and Approvals Delivery Unit in the Agency (target 2 months) Availability of releases addressing agreed change requests and addressing significant bugs (target every 3 months) Proportion of similar clauses between signed CAs (without taking into account clauses dealing with national specificities). – target 80% |
| Pre-conditions for achieving the outcome | Processes and tool ready by 16 th of June 2019 (development phase successfully finalized) Data quality in ERADIS (for SC validity) |
| Progress towards outcome in 2019 | PAD organization to be prepared during the first half of 2019 for implementing the CCM procedure on its processes, procedures and tools. |
| Expected resource envelope > Human resources > Financial resources | ##17.3 FTE ##2 051,54 K€ |
| Fee-based | No |

| List of the main projects/ services | Output indicator | Target for 2019 |
|---|---|--------------------------------------|
| Revision of SSC guides and procedures | Proportion of major problems detected during shadow running, learning cases and trainings to ERA and PoE staff, for which solutions are proposed in the relevant document | 95% by 16 th of June 2019 |
| Revision of VA guides and procedures | Proportion of major problems detected during shadow running, learning cases and trainings to ERA and PoE staff, for which solutions are proposed in the relevant document | 95% by 16 th of June 2019 |
| Revision ERTMS Trackside approval guide and procedures (including the follow up of funded projects) | Proportion of major problems detected during shadow running, learning cases and trainings to ERA and PoE staff, for which solutions are proposed in the relevant document | 95% by 16 th of June 2019 |
| Internal procedure for fees and charges financial tool | Proportion of major problems detected during shadow running, learning cases and trainings to ERA and PoE staff, for which solutions are proposed in the relevant document | 95% by 16 th of June 2019 |
| Technical programme for SSC and VA Training – first round of training modules | Proportion of the identified experts from the ERA and the NSA from MS not having notified the transposition by 2020 who are trained | 90% by 16 th of June 2019 |
| OSS releases | Proportion of significant problems detected during shadow running or user acceptance tests for which solutions are available in the release 1.0. | 95% by 16 th of June 2019 |
| Establishment of the Board of Appeal | BoA established | By 16 th of June 2019 |
| Negotiation of the Cooperation Agreements with NSAs | Proportion of Cooperation Agreements signed with the NSAs of MSs not having notified the transposition in June 2020 | 95% |
| VA Learning cases | Proportion of applicants' requests for LC where the Agency is able to be engaged | 80% |
| ERTMS trackside approval Learning cases and follow up of funded projects | Proportion of applicants' request for LC and request for follow up of funded projects where the Agency is able to be engaged | 80% |
| SSC Learning cases | Proportion of RUs for which the Agency will take the decision and having one of their SC expiring by end of 2019 engaged in LC | 80% |
| Business helpdesk SSC/VA/ERTMS Trackside | Business helpdesk SSC/VA/ERTMS Trackside effective | By 16 th of June 2019 |
| | Proportion of the requests on the Agency scope of work addressed to the business helpdesk answered within 10 working days | 90% |

Objective 3.2 Issuing Single Safety Certificates

| | |
|--|---|
| Expected outcome | Reduced costs (time spent) for issuing Single Safety Certificates compared with the baseline established with the start of the 4 th Railway Package Low rate of reviewed decisions. Very low rate of decisions brought to the Board of Appeal. |
| Outcome indicator | 5 % of cost reduction. Less than 5 % of the decisions reviewed after applicant request for review. Less than 1 % of the decisions brought to the Board of Appeal. |
| Pre-conditions for achieving the outcome | ##Timely transposition by MS. ##Same trend in time and cost reduction from the NSAs participating in the assessments. ##Effective cooperation agreements. ##Availability of SSC expertise. |
| Progress towards outcome in 2019 | Baselines for the expected outcomes need first to be established from mid-2019 till end of 2020 (or end of 2021 if a lot of MS will only transpose in 2020), therefore the monitoring of the outcomes can only happen afterwards. Most of the progress towards outcomes will be visible from 2021 (or 2022 if a lot of MS will transpose in 2020). |
| Expected resource envelope > Human resources > Financial resources | Resources have been estimated taking into account that all MS will have transposed by mid of June 2019: ##7.5 FTE (ERA scope of work) ##Title 4 |
| Fee-based | Entirely |

| List of the main projects/services | Output indicator | Target for 2019 |
|------------------------------------|--|-----------------|
| Issuing Single Safety Certificates | Proportion of decisions taken according to the legal framework deadlines(for completeness and assessment phases) | 100% |

Objective 3.3

Issuing Vehicle Authorisation, including ERTMS on-board assessments

| | |
|--|---|
| Expected outcome | Reduced costs (time spent) for issuing vehicle (type) authorization compared with the baseline established with the start of the 4 th Railway Package. Low rate of reviewed decisions. Very low rate of decisions brought to the Board of Appeal. Reduced time for authorization in conformity to type |
| Outcome indicator | 5 % of cost reduction. Less than 5 % of the decisions reviewed after applicant request for review. Less than 1 % of the decisions brought to the Board of Appeal. 95% of the authorization in conformity to type in less than one week |
| Pre-conditions for achieving the outcome | ##Timely transposition by MS. ##Same trend in time and cost reduction from the NSAs participating in the assessments. ##Effective cooperation agreements. ##Availability of VA expertise. |
| Progress towards outcome in 2019 | Baselines for the expected outcomes need first to be established from mid-2019 till end of 2020 (or end of 2021 if a lot of MS will only transpose in 2020), therefore the monitoring of the outcomes can only happen afterwards. Most of the progress towards outcomes will be visible from 2021 (or 2022 if a lot of MS will transpose in 2020). |
| Expected resource envelope > Human resources > Financial resources | Resources have been estimated taking into account that all MS will have transposed by mid of June 2019: ##12.5 FTE (ERA scope of work) ##Title 4 |
| Fee-based | Entirely |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|---|-----------------|
| Issuing Vehicle Authorisation, including ERTMS on-board assessments | Proportion of decisions taken according to the legal framework deadlines (for completeness and assessment phases) | 100% |

Services related to facilitation measures, at the request of the applicants and the NSAs, to support smooth transition between the current legal framework and the new one under the 4th Railway Package (in accordance with Art. 55 and 56 of the Implementing Act on the practical arrangements for VA)

Services provided

Upon request

Objective 3.4

Issuing ERTMS trackside approvals

| | |
|--|---|
| Expected outcome | Reduction of interoperability issues in ERTMS trackside projects Very low rate of decisions brought to the Board of Appeal. |
| Outcome indicator | Continuous reduction of interoperability issues in ERTMS trackside projects. Less than 1 % of the decisions brought to the Board of Appeal. |
| Pre-conditions for achieving the outcome | Timely transposition by MS. Availability of technical experts. Tendering process not closed before 15 th of June 2019 |
| Progress towards outcome in 2019 | Baselines for the expected outcomes need first to be established from mid-2019 till end of 2020 (or end of 2021 if a lot of MS will only transpose in 2020), therefore the monitoring of the outcomes can only happen afterwards. Most of the progress towards outcomes will be visible from 2021 (or 2022 if a lot of MS will transpose in 2020). |
| Expected resource envelope > Human resources > Financial resources | ##1.1 FTE ##Title 4 |
| Fee-based | Entirely |

| List of the main projects/services | Output indicator | Target for 2019 |
|------------------------------------|---|-----------------|
| Issuing Approvals | Proportion of decisions taken according to the legal framework deadlines (for completeness and assessment phases) | 100% |

Objective 3.5 Railway System Data

| | |
|--|--|
| Expected outcome | Provide timely and quality data for identified use cases (internal and external) e.g. to facilitate route compatibility testing, authorization processes, planning and operational purposes and to monitor the implementation of SERA. |
| Outcome indicator | Fulfilment of use cases by registers and databases Usability of the Agency's IT tools for registers and databases Data completeness in Agency's registers and databases |
| Pre-conditions for achieving the outcome | Business part: Clear definition of users' needs based on stakeholders' expectations and feedback IT part: Availability of IT expertise Data: Good level of quality for the data inputs from external stakeholders |
| Progress towards outcome in 2019 | Updates to RINF in accordance to specifications for route compatibility check Updates to ERATV for alignment with 4RP requirements OSS –ERADIS interface established for SSC New ECM certificate structure enabled in ERADIS. |
| Expected resource envelope > Human resources > Financial resources | ##8 FTEs ##633.77 KE |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|--|---|
| ERADIS (users support - validation and publication of safety certificates, licenses and ECM certificates, specific training of users - maintenance and development) | (Development) New interface with OSS | Released by June 2019 |
| | (Development) New use cases and interface implemented for ECM certificates | Released by December 2019 |
| | (Operations / maintenance / support) % of safety certificates published on time | 98% |
| | (Operations / maintenance / support) No of ERADIS users from NSA staff trained | 2 workshops/ trainings organised for users |
| RDD maintenance | (Development) % of change requests in scope of the release of RDD | 100% implemented by end of 2019 |
| | (Operations / maintenance / support): % System availability for RDD | 98% |
| ERATV (Development according specifications for alignment for 4RP requirements, development of an interface with OSS, maintenance and users support) | (Development) % of published vehicle type authorizations issued under 4RP | 100% from mid-2019 |
| | (Development) % Analysis of the interface started in coordination with OSS | 100% in 2019 |
| | (Operations / maintenance / users support): % System availability | 98% |
| RINF (new parameters and development of core functionalities for supporting the Route Compatibility check by RUs, monitoring of Implementation by MS, maintenance and users support) | (Development) RINF updated with new parameters and core functionalities in operation | June 2019 |
| | Application Programming Interface (API) | Ready by end 2019 |
| | Definition of indicators: Monitoring of data imported by MS; provision of reports | 100% One report published by end of 2019 |
| | (Operations / maintenance / support): System availability | 98% |
| VKMR | % VKM published | 100% |
| Establishing an EVR on the basis of the current ECVR | (Development): EVR specifications for the implementation of the interfaces with the decentralized registration function available (Development): Specific changes to the core architecture of previous ECVR | 95% Released by end 2019 before testing |
| | (ECVR Operations / maintenance / support): % system availability | 98% |

4. Activity 4 Monitoring, evaluating and reporting

Objective 4.1

Collect and analyse evidence for decision making

| | |
|--|---|
| Expected outcome | Support decision making with better evidence and knowledge |
| Outcome indicator | Proportion of Agency's project portfolio for which relevant, coherent and clear evidence is available |
| Pre-conditions for achieving the outcome | Reliable, consistent and comprehensive (by country / stakeholder) data for decision-making including IAs, ex-post evaluation and other pertinent analyses. Integrated data management (reference and master data, data quality, data warehousing and business intelligence). |
| Progress towards outcome in 2019 | After a pilot phase, in 2019 Economic Steering Group Task Forces will examine in-depth evidence on the outcomes of the various objectives (topics) from the Agency's work programme. In particular, an ESG Task Force on operational registers is foreseen in order to determine a multi-annual road map in this area. In addition, in line with the Agency Regulation (Article 8(3)), priority will be assigned to complete particular ex post assessments of legislation based on Agency recommendations in order to determine any potential for optimisation. It is planned that at least one ex post assessment will be completed in 2019. In accordance with the Article 8(1) of the Agency Regulation will ensure that all RECs and OPIs issued in 2019 are accompanied by impact assessments, thereby supporting evidence-based decision-making. |
| Expected resource envelope > Human resources > Financial resources | ##2.5 FTEs ##6.85 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|--|----------------------|
| Impact assessments for recommendations and opinions | % of issued recommendations and opinions accompanied by an impact assessment | 100% |
| Ex post assessment for selected topics | Number of completed ex-post evaluations | 1 |
| Economic Steering Group and task forces | Report on business analyses for Agency databases and registers endorsed by ESG | Delivered by Q3 2019 |

Objective 4.2 Monitoring

| | |
|--|---|
| Expected outcome | Contribute to improving overall EU safety and interoperability by increasing quality of and the trust in the work performed by NSAs, NIBs, NoBos and recognised assessment bodies for an effective and efficient implementation of the 4RP provisions. |
| Outcome indicator | Perception of stakeholders (baseline for 2019 and progress report in 3-5 years' time). |
| Pre-conditions for achieving the outcome | ##audit team will have to follow a certified IRCA course on audits on management system ##timely access to NIB reports ##NSA, NoBos, AsBos commitment and availability |
| Progress towards outcome in 2019 | After a pilot phase, 2019 will be the start of the NSAs Monitoring schemes. Moreover, in 2019 the NoBos Monitoring scheme will be implemented. As requested by the Agency Regulation (Art. 33 and 34), both schemes have been endorsed by the Management Board. |
| Expected resource envelope > Human resources > Financial resources | ##10.3 FTEs ##462.79 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|---|--|
| NSA Annual Safety report analysis | Qualitative analysis of NSA Annual Safety reports to be presented at the NSA annual performance review Workshop | 1 summary analysis presented at the workshop |
| NSA monitoring | No. of recommendations/audit reports delivered | 8 |
| Support the NIB Peer review system | Information report by ERA as observer to the NIB Peer Review task force | Delivered |
| Review of NIB accident investigation reports | Qualitative analysis of NIB accident investigation reports | 1 summary analysis delivered |
| CSM Risk Assessment Recognition bodies peer review | Information report by ERA as observer to the CSM RA recognition body peer review system | Delivered |
| NoBos monitoring | No. of reports for NoBos audit/inspection (Agency supporting the Accreditation Bodies/National Authorities) | 4 |

Objective 4.3

Identifying research needs for the Target Rail System and supporting partner organisations in research and innovation

| | |
|--|--|
| Expected outcome | Influence EU research and innovation programmes / projects to support the policies and framework of a SERA |
| Outcome indicator | SERA needs addressed by EU research and innovation programmes / projects (closure of open points, projects outputs incorporated in EU regulatory texts). |
| Pre-conditions for achieving the outcome | ##Visibility of the Research Steering Group activities in the Agency ##Steady coordination with all stakeholders EC, ERRAC, GRB and S2R |
| Progress towards outcome in 2019 | SERA needs taken into account in 2019 in the influenced research and innovation programmes / projects |
| Expected resource envelope > Human resources > Financial resources | ##4 FTEs ##43.24 KE |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|--|---|
| Technological Watch | Service running | Criteria to measure the use of the service identified and a 1 st survey done end 2019 |
| Support to S2R as requested by the S2R regulation Cooperation with other research bodies (ERRAC, EASA, other) | Research projects of interest for ERA identified, followed and monitored ERA 2020 needs for research identified | 100% of S2R projects analysed and projects of interest for ERA identified ERA 2020 needs for research fed in time to the relevant EU bodies (ERRAC, S2R, EC) |

Objective 4.4 Reporting on the Railway System

| | |
|--|---|
| Expected outcome | Transparency on the progress towards the achievement of the SERA framework (progress with safety, interoperability and efficiency of the Union railway system) in order to identify the need for value-added measures |
| Outcome indicator | Number of internal and external users of Agency datasets and reports on the railway system |
| Pre-conditions for achieving the outcome | Availability and access to relevant / harmonized data (internal and external), incl. IT tools, where needed Availability of relevant IT-tools for data analysis and visual display (e.g. SPSS, GIS etc.) |
| Progress towards outcome in 2019 | Emphasis in 2019 will be placed on the annual overviews for the Report on Railway Safety and Interoperability (next edition to be published in 2020) and on the annual assessment of achievement of safety targets. |
| Expected resource envelope > Human resources > Financial resources | ##2.4 FTEs ##4.73 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|--|---|
| Report on progress with safety and interoperability in SERA (AR, Art. 35(4)) | Annual overviews available on time | Annual overview 2019 available by Dec. 2019 |
| Annual assessment of achievement of safety targets (CSTs assessment report) SAD (Art.7) on the basis of gathered CSIs + support to Eurostat | Annual assessment report on achievements of CSTs | 31/03/2019 |

5. Activity 5 Delivering efficient and effective services

Objective 5.1

Ensure good corporate governance

| | |
|--|---|
| Expected outcome | Legal, quality and information security compliance Effective and efficient corporate governance of the Agency |
| Outcome indicator | Degree of compliance to the legal, quality and information security requirements Effectiveness and efficiency gains for the Agency Effective EB and MB organisation |
| Pre-conditions for achieving the outcome | Cultural change towards effectiveness and efficiency gains |
| Progress towards outcome in 2019 | Legal, quality and information security compliance Starting a task on effectiveness and efficiency gains in the Agency |
| Expected resource envelope | |
| > Human resources | ##20.5 FTE |
| > Financial resources | ##139.69 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--------------------------------------|--|---|
| Issuing and updating SPD and AAR | SPD 2020 | Adopted by MB |
| | AAR 2018 | Adopted by MB |
| Supporting EB and MB meetings | % of mandatory decision topics for 2019 covered by the EB/MB meetings | 100% |
| ICC services | % of nonconformities identified in the IMS Review report and ex-ante/ ex post controls, for which corrective/ preventive actions are established | 100% |
| | Agency risk assessment | Documented and reported in the AAR |
| | % of ERA staff made aware of antifraud and ethics | 75% cumulated |
| | % of declarations of conflict of interest of staff published in the conflict of interest register | 100% |
| Legal support | % of legal acts issued by ERA, as defined by the Agency regulation, for which legal advice was provided | 100% |
| Accounting | Opinion in the CoA annual report on reliable Agency accounts | Positive |
| Integrated Management System | Rate of closing pre-2019 audits findings | 100% |
| | ISO 9001 certification Preliminary audit for the extension of the ISO 9001 certification to the delivery process | ISO 9001 certification maintained Implemented |
| SECURIS (SECURe Information Systems) | % of SECURIS rules and procedures developed in IMS | 100% |
| | % of Information assets identified | 75% |
| | % of Information assets inventoried | 10% |

Objective 5.2

Ensuring sound management of the Agency's human and financial resources and building facilities

| | |
|--|--|
| Expected outcome | Ensure effective and efficient functioning of the Agency through sound management of human resources, budget and building facilities |
| Outcome indicator | No business disruptions (related to IT systems for finance, staff and building availability) jeopardizing the fulfilment of the critical functions of the Agency All activities foreseen in the SPD and in particular those linked to the 4RP are effectively implemented Budget used for the intended purpose, respecting the sound financial management principle. Budget discharge granted Increase digital and paperless processes in the administrative area (financial/HR) |
| Pre-conditions for achieving the outcome | Stability of EC IT tools and possibility for customization |
| Progress towards outcome in 2019 | Progress with paperless processes Continuous support in terms of HR, budget and building facilities, especially considering the start of the 4 th Railway Package delivery |
| Expected resource envelope > Human resources > Financial resources | ##26 FTEs ##1435 K€ ¹ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|---|--|--|
| Selection, Engagement, Learning and Development | % implementation of the establishment plan | 98% |
| | % of staff turnover | ≤ 5% |
| | % of time spent for learning and development out of total working time | N.a. |
| Annual budget execution | % of the annual appropriations committed | 98 % |
| | % of carry-over of payment appropriations | <10% for T1, <20% for T2 and <30% for T3 |
| | % of execution of C8 payment appropriations | 95 % |
| | % payments made by contractual deadline | >95% |

¹ For fiche 5.2, the amount mentioned refers to Title 2 (indirect costs).

Objective 5.4 Communicating effectively through website and social media

| | |
|--|--|
| Expected outcome | Starting June 2019 the Agency will strengthen even further its role of active player of the railways system, with crucial task. The public approaches the Agency using online channels. The need to consolidate our presence on the web, by stabilizing and improving the new website (and contents) and increase our social media participation become increasingly important. To all this, a proper management of the stakeholders (via the SRM tool) can contribute by increasing the number of website visitors. |
| Outcome indicator | Social media presence Website visitors Stakeholder feedback |
| Pre-conditions for achieving the outcome | Being an activity related essentially to external communication, the risk of reputational damages due to potential miscommunication practices is high, consequently the feasibility of the activities is strictly linked to the availability of media contents and qualified staff. |
| Progress towards outcome in 2019 | Consolidating the SRM (internal training and add-ons) the new website, feeding the YouTube channel with technical contents, using a LinkedIn page. |
| Expected resource envelope > Human resources > Financial resources | ##1.5 FTEs ##107.93 K€ |
| Fee-based | No |

| List of the main projects/services | Output indicator | Target for 2019 |
|--------------------------------------|---|-------------------|
| Stakeholder Relation Management tool | Training sessions on Comms functions | 10 |
| | Add-on | Implemented |
| | ERA staff requests addressed | 100% |
| Website/online | Website visitors | Increasing trend |
| | % of internal change requests implemented | 100% |
| | Number of followers | Increasing trend |
| | LinkedIn | 1 article a month |

Objective 5.5 Ensuring efficient and effective communication (internal and corporate)

| | |
|--|---|
| Expected outcome | Support the new role of the Agency by creating and implementing a Crisis communication process (useful when the Agency will issue SSCs and VAs), will promote the work done in the field of safety and interoperability by mean of publications (paper and digital versions). Events are also part of the process with recurrent seminars and conferences with important speakers and contributors. The Women in Transport project will have a particular positive impact on the Agency reputation. |
| Outcome indicator | Events management Stakeholders feedback Timely publication Process established |
| Pre-conditions for achieving the outcome | Access to technical, human and financial resources to deliver the relevant activities |
| Progress towards outcome in 2019 | Establishment of a crisis management process Publications Events management and stakeholders feedback Women in transport activity Communication plan (required by the Agency Regulation) |
| Expected resource envelope > Human resources > Financial resources | ##4.4 FTEs ##210.9 KE |
| Fee-based | No. There is no legal basis for charging events participants. |

| List of the main projects/services | Output indicator | Target for 2019 |
|--|---|--------------------------------|
| Development and implementation of a crisis management capability (including a briefing system) | Process deployment and implementation | IMS documentation produced |
| | Training staff | delivered |
| Women in transport | Project plan and actions | Approved |
| Publication management | % of planned publications delivered | 100% |
| Event management | Event organized, delivered with positive feedback from the stakeholders | At least 2 (CCRCC, multimodal) |
| Provisions, strategy and plans for an effective and efficient communication | Communication plan | Drafted and approved |

Annexes

Annex I: Resource allocation

1. Multi-annual resource allocation

The communication COM (2013)519 of 10/07/2013 on the programming of human and financial resources for decentralised agencies 2014-2020 contains the following planning for the Agency:

| Year | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 |
|--------------------------|--------|--------|--------|--------|--------|--------|--------|--------|
| Budget (Mio€) | 25,007 | 25,007 | 25,613 | 26,000 | 26,000 | 26,250 | 26,500 | 26,750 |
| Establishment Plan (TAs) | 143 | 140 | 137 | 134 | 139 | 148 | 148 | 148 |

2. Resource allocation 2019

| Activity | Unit Staff | DIRECT COSTS | | INDIRECT COSTS | | | TOTAL BUDGET 2019 PER ACTIVITY |
|--|------------|----------------------|---------|----------------|-----------|----------------------|--------------------------------|
| | | Title 3 - CHAPTER 30 | TITLE 4 | TITLE 1 | TITLE 2 | TITLE 3 - CHAPTER 31 | |
| | FTE | | | | | | |
| 1. Contributing to shaping the target and global reference | 21.85 | 305,109 | | 2,186,615 | 288,650 | 152,410 | 2,932,784 |
| 2. Developing the Harmonised Regulatory SERA Technical Framework | 38.15 | 323,469 | | 3,817,820 | 503,982 | 266,106 | 4,911,377 |
| 3. Implementing the Harmonised Regulatory SERA Technical Framework (under 4RP) | 46.40 | 2,685,307 | pm | 4,643,430 | 612,968 | 323,652 | 8,265,358 |
| 4. Monitoring, Evaluating and Reporting | 19.20 | 517,602 | | 1,921,419 | 253,642 | 133,925 | 2,826,589 |
| 5. Delivering efficient and effective services | 64.40 | 458,513 | | 6,444,761 | 850,758 | 449,207 | 8,203,239 |
| Grand total | 190.00 | 4,290,000 | pm | 19,014,047 | 2,510,000 | 1,325,300 | 27,139,347 |
| | | | | 19,014,047 | 2,510,000 | 1,325,300 | |

Annex II: Financial Resources 2019-2021

Table 1 – Expenditure

| Expenditure | 2018 | | 2019 | |
|--------------------------|---------------------------|------------------------|---------------------------|------------------------|
| | Commitment appropriations | Payment appropriations | Commitment appropriations | Payment appropriations |
| Title I | 18 790 000 | 18 790 000 | 19 014 047 | 19 014 047 |
| Title II | 2 750 000 | 2 750 000 | 2 510 000 | 2 510 000 |
| Title III | 7 253 243 | 7 253 243 | 5 615 300 | 5 615 300 |
| Title IV* | | | pm | pm |
| Total expenditure | 28 793 243 | 28 793 243 | 27 139 347 | 27 139 347 |

* Given the uncertainty on transposition by Member States in 2019 and 2020, respectively, as well as the uncertainty as regards the volume and timing of work for VA, SSC and ERTMS trackside approval requests, the Agency is not in the position to give an estimate of the revenues, expenditure and associated inflows/outflows related to the fees and charges activities.

The Agency is at this stage asking the MB to agree for Title 4 to be created in the budget, while the actual revenues, expenditure and cash flow figures, included any support needed from EC, will be brought to attention later in 2019, once sufficient data is available.

| Item | EXPENDITURE | Budget 2018 | Draft budget 2019 | | VAR N+1/N | Envisaged 2020 | Envisaged 2021 |
|----------------|--|-------------------|-------------------|-------------------|---------------|-------------------|-------------------|
| | | | Agency request | Budget forecast | | | |
| TITLE 1 | EXPENDITURE RELATING TO PERSONS WORKING WITH THE ERA | | | | | | |
| Chap. 11 | Staff in active employment | 18 115 000 | 19 160 000 | 18 444 000 | 1.8% | 18 444 000 | 18 444 000 |

| TITLE 4 | EXPENDITURE RELATING TO FEE-RELATED ACTIVITIES | | | | | | |
| Chap. 40 | SSC | - | pm | pm | | pm | pm |
| Chap. 41 | VA | - | pm | pm | | pm | pm |
| Chap. 42 | ERTMS Trackside approvals | - | pm | pm | | pm | pm |
| Chap. 43 | Assistance provided to MS, candidate countries and other stakeholders | - | pm | pm | | pm | pm |
| TITLE 4 | TOTAL TITLE 4 | - | pm | pm | | pm | pm |
| | GRAND TOTAL | 28 793 243 | 32 214 290 | 27 139 347 | -5.7% | 28 139 347 | 28 139 347 |

*The Agency draws attention that the cost of the activities created under the 4th Railway Package were not properly factored in the MFF. In order to cover this expenditure, the Agency will deprioritise other categories of expenditure in 2019. For 2020 and 2021, it is crucial that this amount be covered in the budget.

Breakdown of Title 3 - Chapter 30 (Operational expenditure) for 2019

These amounts are the ones from the individual objective fiches from the annual section of the programming document

| | | |
|--|--|------------------|
| Activity 1 - Contributing to shaping target reference and global reference for the EU rail system | | 305,109 |
| 3000 | Strengthening global cooperation in rail | 218,491 |
| 3001 | Strategic development | 9,260 |
| 3002 | Enhancing Railway Safety through positive safety culture and integrating influencing human and organisational factors | 77,358 |
| 3003 | | <i>pm</i> |
| 3004 | | <i>pm</i> |
| Activity 2 – Developing the harmonised regulatory SERA technical framework | | 323,469 |
| 3010 | Harmonised Railway Operations and Management Systems | 51,781 |
| 3011 | Harmonised technical specifications (fixed installations and vehicles) | 116,669 |
| 3012 | Harmonised Train Control System and telematics (communications, signalling, ERTMS system authority, telematics system authority) | 72,098 |
| 3013 | Disseminating and Training to support implementation of the EU framework | 82,921 |
| Activity 3 - Implementing the harmonised regulatory SERA technical framework (under 4RP) | | 2,685,307 |
| 3020 | Ensuring the coordination of the Fourth Railway Package implementation | 2,051,536 |
| 3022 | Railway system data (Registers; e.g. RINF, ERADIS, ERATV, EVR, ECVVR, SAIT, RDD) | 633,771 |
| Activity 4 - Monitoring, evaluating and reporting | | 517,602 |
| 3030 | Collect and analyse evidence for decision making | 6,849 |
| 3031 | Monitoring | 462,787 |

| 6 REVENUES FROM SERVICES RENDERED AGAINST PAYMENT | | | | | | | |
| 7 CORRECTION OF BUDGETARY IMBALANCES | | | | | | | |
| TOTAL REVENUES | 30 732 000 | 28 793 243 | 27 139 347 | 27 139 347 | -5.7% | 28 139 347 | 28 139 347 |

*The amount for 2020 is higher than the one envisaged. This is needed to cover the maintenance costs for OSS, as well as the costs for the entire package of new tasks compared to the past (NSA monitoring, NoBo monitoring, EVR, interface OSS-ERADIS, OSS-EVR and OSS-ERATV etc.). In 2019 an effort was made to fit in the envelope of the EU contribution of 26.5 mill € by deprioritizing some of the other expenditure. This effort is not sustainable for 2020.

Table 3 – Budget outturn and cancellation of appropriations

| Budget outturn | 2015 | 2016 | 2017 |
|---|-----------------|----------------|---------------|
| Reserve from the previous years' surplus (+) | 787 016 | 357 347 | 378 214 |

Annex IV

A. Engagement policy

The following general principles guide the application of the legal framework concerning the Agency staff:

- a) The core of the Agency staff consists of Temporary Agents. All Temporary Agent positions have been identified as long-term positions. Due to the budgetary and establishment plan constraints the Agency is obliged to also engage Contract Agents in order to fulfil its mission;
- b) Temporary and Contract Agents are as far as possible treated in the same way.

In addition, it should be noted that the Agency does not employ officials. However, there are cases where EU officials have been seconded at their own request and have therefore acquired the status of Temporary Agent.

Selection and engagement procedures:

The procedure for selection and engagement of Temporary Agents and Contract Agents is based on Articles 27-34 of the Staff Regulations and Articles 12-15 and 82-84 of the Conditions of Employment of Other Servants of the European Communities (CEOS), the related Implementing Rules on Temporary Agents and Contract Agents, the Financial Regulation (European Commission and the Agency), the Code of Good Administrative Behaviour and the data protection rules.

As nationals of Norway, Iceland and Liechtenstein are eligible for working for the Agency, it only exceptionally makes use of the general CAST lists for Contract Agents established by EPSO.

The selection procedures for the engagement of Temporary Agents are carried out in accordance with Decision N° 121 of the Administrative Board of the European Railway Agency laying down the general implementing provisions on the procedure governing the engagement and use of temporary staff under Article 2(f) of the CEOS.

Depending on the function and the level of tasks and within the limits authorised by the establishment plan of the Agency, Temporary Agents are engaged at the following entry grades:

- › AST 1 to AST 4 for the function group AST
- › AD 5 to AD8 for the function group AD

For managerial posts or highly specialised posts, the Agency can engage Temporary Agents at grades AD 9, AD10, AD11 or on an exceptional basis, at grade AD12. However, except for the post as Executive Director, no post has so far been filled at a level above AD11.

In the TA 'Assistant' function group, engagement at a grade higher than the one provided for above can exceptionally take place on the basis of an analysis of the labour market conditions and the need for particularly experienced staff.

The duration of contracts for Temporary Agents is governed by Decision N° ERA-ED-DEC-1109-2015. Staff holding a long-term post are normally offered an initial contract with a duration of four years with the possibility of renewal. The standard practice for a first renewal is normally for a two-year period and any further renewal is for an indefinite period. For staff on short-term employment, the duration of the contract depends on the duration of the tasks to be carried out.

a. Temporary agents

The new Agency Regulation which entered into force in 2016 makes no distinction between posts for long-term and short-term employment. Still a post can, in accordance with Article 16 of Decision no. 121, be defined to be for short-term employment when it involves tasks of a limited duration.

The decision to renew contracts of employment of Temporary Agents occupying a long-term post shall be taken by the Executive Director based on two considerations: the continuity of the post and the competences and performances of the jobholder, in accordance with Decision N° ERA-ED-DEC-678-2013 and the Procedure PRO_STA_01 on "renewal and non-renewal of contracts of employment before the expiry date".

If a TA or former TA is awarded a second contract of employment in the same function group, this contract shall be considered as a renewal in the sense of Article 8 of the CEOS if the period between the end of the first contract and the starting date of the new contract is less than 6 months. If the period between the two contracts of employment is 6 months or more or if the new contract is in a different function group, the second contract of employment shall be considered a new contract of employment.

b. Contract agents

In accordance with Article 85 of the CEOS, contract staff can be engaged for a fixed period of at least three months and not more than five years. Contract Agents are engaged for their specific competence in different areas of administration (finance, HR, IT, logistics, legal, audit, quality management), in the railway domain or to perform manual or administrative tasks.

This type of contract is usually used to meet specific needs such as:

- › Administrative tasks;
- › Coping with temporary peaks in workloads;
- › Launching projects or new activities for which long-term commitment in terms of staffing is unclear;
- › Replacing staff on long-term absences such as maternity leave, long-term sick leave or unpaid leave;
- › Unforeseen deficits in staffing levels and budgetary restrictions in overcoming this problem by engaging Contract Agents.

However, increasingly ERA has also engaged Contract Agents for other (long-term) tasks, such as:

- › Administrative and Logistician Support Agents
- › Assistants
- › Project Officers

c. Seconded national experts¹

SNEs are seconded from their national employer to the Agency's operational units on the basis of their specific competenc(i)es and technical expertise in the railway domain.

A possibility to mandate 'cost-free' SNEs also exists where the Agency does not pay any allowances or cover any of the expenses related to the performance of their duties during their secondment although the Agency does not deploy such SNEs at the moment.

SNEs assist the Agency staff and cannot perform middle management duties. The initial period of secondment may not be less than six months or more than two years. It [anchor - check ms]may be renewed once or more up to a total period not exceeding four years. Exceptionally, the Agency's Executive Director may authorise one more extension of the secondment for the maximum duration of one year at the end of the four year period.

¹ SNEs are not employed by the Agency.

Each secondment and extension is subject to an exchange of letters. An SNE may be seconded once again provided that the conditions of secondment still exist and a period of at least six years has elapsed between the end of the previous secondment and the new secondment unless the previous secondments lasted for less than four years.

Types of key function: Project Officer

d. Trainees

Professional traineeships last between three and five months in accordance with Decision N° ERA-ED-DEC-1063-2015. Professional traineeships are organised once or twice per year, depending on budget availability.

e. Structural service providers¹

| Staff FTE | Tasks | Description | PD per Year | Total PD per Year | Framework Contract | Expiring |
|-----------|--------------------------------|--|-------------|-------------------|------------------------------|--------------------------|
| 8 | Service Desk | User support and assistance | 220 | 1760 | ESP/EISD5 signed in May 2015 | Date of signature, 3+1 Y |
| 4 | Senior Analyst Programmer | Writing/maintenance/prototyping of applications that reflect the specifications. | 220 | 880 | ESP/EISD5 signed in May 2015 | Date of signature, 3+1 Y |
| 1 | Front End Developer | Creation and staging of Stakeholder Relationship Management tool | 220 | 220 | ESP/EISD5 signed in May 2015 | Date of signature, 3+1 Y |
| 1 | Application Architect Designer | Design and development OSS | 220 | 220 | ESP/EISD5 signed in May 2015 | Date of signature, 3+1 Y |
| 1 | Receptionist | 3 shifts per day | | | | |

¹ Structural service providers are not employed by the Agency.

B. Appraisal of performance and reclassification/promotions

The Agency applies Decision N° 132 of the Administrative Board of the European Railway Agency on the general provisions for implementing Article 43 of the Staff Regulations and implementing the first paragraph of Article 44 of the Staff Regulations for temporary staff and Decision N° 133 of the Administrative Board of the European Railway Agency on the general provisions for implementing Article 87(1) of the Conditions of Employment of Other Servants of the European Union and implementing the first paragraph of Article 44 of the Staff Regulations. They were applied for the first time for the appraisal and reclassification exercise taking place in 2016. The 11th reclassification exercise took place in 2017 and 13 members of staff were reclassified. The present reclassification policy complies with the principles established in the Commission's model decision on reclassification of Temporary Agents. Since 2016, the Agency adopted rules for the reclassification of Contract Agents.

Table 1 - Reclassification of temporary staff/promotion of officials

| Category and grade | Staff in activity at 01.01.2017 | | How many staff members were promoted / reclassified in 2017 ¹ | | Average number of years in grade of reclassified/promoted staff members |

|--------------------|---------------------------------|----|---|----|---|
| | officials | CA | officials | CA | |
| FG I | | 3 | | | |
| FG II | | 6 | | 2 | 5 years 2 months |
| FG III | | 9 | | | |
| FG IV | | 12 | | | |
| Total CA | | 30 | | | |

C. Mobility policy

1. Mobility within the agency

Decision N° 121 of the Administrative Board of the European Railway Agency laying down the general implementing provisions on the procedure governing the engagement and use of temporary staff under Article 2(f) of the CEOS (adopted on 25.11.2016) enshrines two scenarios for internal mobility for TA 2(f). These are reassignment in the interest of the service and mobility following the internal publication of a post.

The Agency actively promotes internal mobility but due to the very specific, technical competences of a big part of the staff, internal mobility remains limited.

Furthermore, members of the Agency staff can apply for vacant posts within the Agency advertised externally. A supplementary agreement in accordance with Article 10 of the CEOS will be concluded as required if existing staff get a new job.

2. Mobility among agencies (Inter-agency Job Market)

A number of the support staff who have left the Agency in previous years have accepted Temporary Agent positions in other agencies. In addition, the recent establishment of a number of new Joint Undertakings in Brussels has led to staff leaving and candidates refusing job offers from the Agency. On the other hand, many staff members who took up long-term Temporary Agent positions at the Agency come from other EU Agencies.

With the new implementing rules for 2(f) Temporary Agents, the Inter-Agency Job Market is no longer applicable.

3. Mobility between the agencies and the institutions

Some posts are filled by staff coming from other European institutions (in particular the Commission), although the number remains small.

4. Tables for 2017 (Temporary agents, contract agents and SNE's)

| | 2017 | |
|--|-----------|-----------------|
| | New staff | Departing staff |
| Mobility within the agency | 2 | 2 |
| Mobility among agencies | 0 | 2 |
| Mobility between the agencies and the institutions | 0 | 1 |
| Other | | |
| Total | 2 | 5 |

D. Gender and geographical balance

The following non-discrimination notice is included in all vacancy notices:

“Equal opportunities: The European Union takes great care to avoid any form of discrimination in its recruitment procedures”.

Applications are encouraged from all candidates and facilities management is prepared to accommodate people with disabilities. A positive discrimination policy however has not been put in place.

ERA has been systematically monitoring the gender distribution for its selection procedures. In general, the gender balance at the Agency has been stable over recent years. As can be seen from the “All Staff” pie chart, the figures, based on the situation in 2017, are 62% male staff and 38% female staff.

Even though, the specific business area and technical labour market may be the main reasons for overrepresentation of men in the Agency, in every call for applications, the Agency underlines its commitment to promote equal opportunities, including gender balance and diversity, as also stated in the Agency’s Human Resources strategy. The same applies to the Member States’ representatives in the Management Board.

The Agency welcomes the European Commission’s new Diversity and Inclusion strategy in order to reach at least 40% women in its management by 1 November 2019. However, this strategy is not applicable to the Agency due to its size, type of contract (long-term) and limited possibility of mobility. The Agency nevertheless keeps this target for its entire staff and not only for its Management.

As gender balance across all staff is a concern for many Agencies, we expect a debate at the Network of Agencies in the near future.

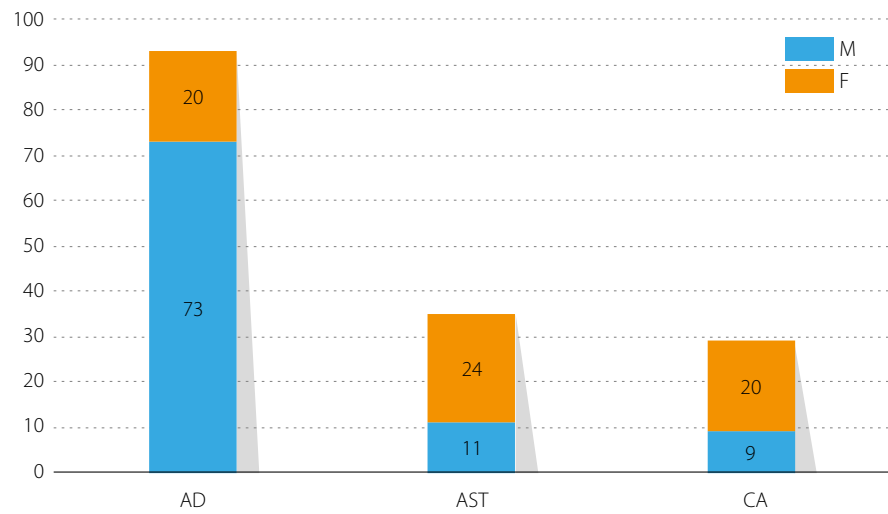

The Agency is participating to the EU “Platform for change”, initiated by the European Economic and Social Committee which was launched in 2017, to address gender equality in transport. The Agency further actively supports initiatives to increase the attractiveness of the railway sector for women, and promotes gender diversity. The current flexi-time policy and the Decision on teleworking of the Agency are designed to facilitate an improved work-life balance.

The gender and nationality distribution are reported below in several graphs: overall staff and breakdown according to the type of contract: Temporary Agents (TA)-Administrators (AD); Temporary Agents (TA) - Assistants (AST); Contract Agents (CA).

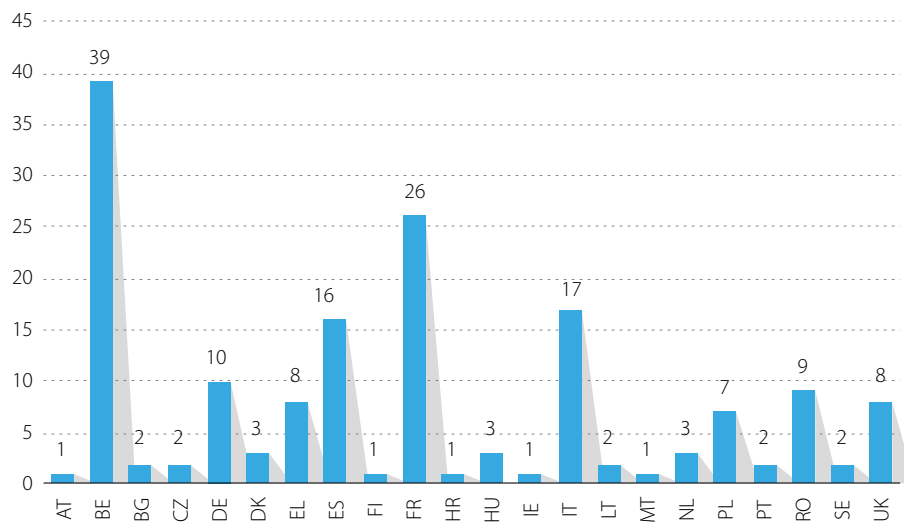

Considering the low number of SNEs (2 persons), this is counted in the overall staff figures, but no breakdown is provided for this category.

The values in the graphs are based on the existing numbers of staff at the end of 2017.

Staff number distribution by gender and category of contract – TA (AD), TA (AST) and CA staff

Staff number distribution by nationality – all staff

Staff number distribution by nationality – TA (AD) staff

Staff number distribution by nationality – TA (AST) staff

Staff number distribution by nationality – CA staff

E. Schooling (Agency Regulation, Art. 71^2)

There is no European School in Valenciennes where the Agency is located and the Agency has no arrangements with any international school in the vicinity. The local schooling system has an international section (English) at college and 'Lycée' level, but the students follow the French curriculum working towards the 'brevet' and the 'baccalaureat' awarded by the French Ministry of Education. There are facilities for international schooling in Lille but many staff members send their children to the European School in Brussels (and for that reason choose to live in Brussels and commute from there).

Annex V: Buildings

5.1.1 Current building(s)

| | Name, location and type of building | Other Comment |
|---|---|--|
| Information to be provided per building: | ERA HQ, Valenciennes, 120 rue Marc Lefrancq | 1. ERA is the only tenant of the building |
| Surface area (in square metres) Of which office space Of which non-office space | 5,250 M ² de Surface Hors Oeuvre Nette (S.H.O.N) | |
| Annual rent (in EUR) | In 2018: EUR 434 659,96 HT/year | The new INSEE indicator will be published during the 1st Quarter 2019. |
| Type and duration of rental contract | 1 year with tacit renewal | |
| Host country grant or support | No | |
| Present value of the building | If the Agency owns the building | |

| | Name, location and type of building | Other Comment |

| Information to be provided per building: | ERA meeting premises, 299, Boulevard de Leeds – Lille | |
| Surface area (in square metres) | 602,62 M ² | |
| Annual rent (in EUR) | In 2017: EUR 110.433,96 HT/year | The new INSEE indicator will be published during the 1st Quarter 2018. |
| Type and duration of rental contract | Contract will end on 31/12/2023. | |
| Host country grant or support | No | |
| Present value of the building | If the Agency owns the building | |

| | Name, location and type of building | Other Comment |
|---|--|---|
| Information to be provided per building: | Rental of 8 parking places from Espace International | |
| Surface area (in square metres) Of which office space Of which non-office space | 8 parking places | |
| Annual rent (in EUR) | In 2017: EUR 20 625.72 HT/year | The new INSEE indicator will be published during the 1st Quarter 2019 |
| Type and duration of rental contract | Contract will end on 31/12/2023. | |
| Host country grant or support | No | |
| Present value of the building | If the Agency owns the building | |

5.1.2 Building project in the planning phase

Due to the growth of the Agency, the current building in Valenciennes is becoming tight. The Agency is currently re-allocating staff members in double office spaces as a short-term solution. The Agency and Valenciennes Métropole have started defining the requirements related to the current and future estimated building's needs to make viable proposals for the headquarters.

Annex VI: Privileges and immunities

The written procedure of the Management Board from August 2018 concerning the approval of a headquarters agreement between the Agency and the host Member State, has been completed successfully. No objections or negative votes were expressed by the members of the Management Board.

| Agency privileges | Privileges granted to staff | |
|--|---|----------------------|
| | Protocol of privileges and immunities / diplomatic status | Education / day care |
| As per PPI and under the HA possibility to have diplomatic plates for 3 Agency cars. The Agency may fly its flag in its buildings and cars | No privileges have been granted to the Agency staff other than the ones envisaged in the PPI. The HA does not confer any additional rights to the Agency staff. | N.a. |

Annex VII: Risks 2019

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|--|---|---|------------------|---|
| 3 | Inconsistent/incorrect transposition of the 4th RWP legislation | <ul style="list-style-type: none"> > Major shortcomings in the project planning (delays and possible complaints from stakeholders) > Inadequate use of resources > Low quality of deliverables (VAs, Safety certificates-SC) which might lead to increase number of appeals to Agency decisions > Low political support/ stakeholders' reluctance > Member States within different area of use might be in a different state of transposition and/or different level of understanding, leading to unclarity in the process might represent a reputational risk for the Agency perceived as main responsible for issuing VA and SC across EU + the success of the Agency as European Authority depends on cooperation with MS + negative impact on the rail market | <p>May be caused by:</p> <ul style="list-style-type: none"> > Insufficient preparedness of the Member States (e.g. roles, responsibilities, working methods) involved in delivering the key processes (i.e. issuing vehicle authorisation, safety certificates; checking ERTMS trackside files) to the specific requirements > New processes/systems of work (i.e. revised CSM, new practical arrangements, relevant guides) not applied in a consistent manner by all concerned actors (NSAs and the Agency) | High (12) | <ul style="list-style-type: none"> a) Participation of the Agency in learning case phase b) Development of clear guides for each of the 3 new tasks c) Support the Commission to enhance communication towards governments |
| 4 | Information security risk | <ul style="list-style-type: none"> > Temporary suspension, slowing down or delay on operational activities/ services > Loss of information registers | <p>May be caused by:</p> <ul style="list-style-type: none"> > Cyberattacks disrupting Agency ICT application systems, including Agency registers | Medium (8) | <ul style="list-style-type: none"> a) Implementation of ICT strategy 2017-2020 with a focus on the measures regarding information security governance (i.e. SECURIS @ERA) Allocate resources to fulfil the function of IT Security Officer |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|---|---|---|------------------|---|
| 5 | Unreliable data in the registers | <ul style="list-style-type: none"> > Misinformed/under informed management decisions > Not delivering complete and accurate products/services > Impose administrative burden to the rail sector | <p>Activity 4: Monitoring, evaluating and reporting</p> <p>Objective 4.1 Collect and analyse evidence for decision making</p> | Medium (9) | a) Implement an effective and consistent management of external data based on Agency Information Management strategy and related implementing program |
| 6 | Noise reduction targets not achieved | <ul style="list-style-type: none"> > Ineffective/ noticeable reduction of noise generated by the rail freight wagons > Public opinion in Member states turning against rail projects > Barriers to railway interoperability and EU railway market | <p>Activity 2: Developing the harmonised regulatory SERA technical framework</p> <p>Objective 2.2 Harmonised technical specifications (fixed installations and vehicles)</p> | Medium (4) | a) Active participation in identifying and rectifying technical issues with CBB |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|--|---|--|------------------|--|
| 7 | Security requirements create new barriers | <ul style="list-style-type: none"> > Delays or limits to the implementation of key objectives in the field of interoperability (i.e. removal of technical barriers, cleaning up of national rules) > Member States could impose additional measures contradicting TSI or ERTMS specifications (e.g. KMS...) (even if the risk is outside the control of the Agency it may entail: <ul style="list-style-type: none"> - adverse reputation due to the perception the Agency is the main responsible for implementation of interoperability and -a higher workload (unplanned)) | <p>May be caused by:</p> <ul style="list-style-type: none"> > Potential occurrence of malicious acts affecting the rail sector > Increase of (cyber) security attacks leads to development of additional security measure > Security is an area under the competence of MS | High (12) | a) The Agency has started in 2018, a collaboration with the Commission, ENISA, and stakeholders in the field of cyber security. The strategy shall be updated during 2018 and include a plan for implementation |
| 8 | EU's railway acquis undermined as global reference for standardisation and regulation | <ul style="list-style-type: none"> > European Framework for Railway regulation and standardisation loses its place as the 'de facto global reference' > Tendency towards fragmentation of the rail sector and market for rail products > Increased costs for rail products > Slow innovation compared to other modes of transport | <p>Activity 1: Contributing to shaping target and global reference</p> <p>Objective 1.1 Strengthening global cooperation in rail</p> <p>May be caused by:</p> <ul style="list-style-type: none"> > EU Railway acquis unnecessarily complex and/or limited in scope therefore not suitable for adoption by others as global reference > Railway standards' content migrating from CEN-CENELEC to ISO IEC, under the influence of political powers outside the EU | Medium (9) | <p>a) Contribute to the Commission's action to promote EU acquis by providing specific targeted dissemination on the railway regulatory and standards framework by fulfilling EU Medrail and IPA contracts and participating in other ad-hoc initiatives organised by the EC (e.g. workshop in India spring 2019) - PM - continuous</p> <p>b) Implement an action plan of targeted engagement with out of EU entities (e.g. GCC, FRA, MILIT) in order to keep up with scientific and technical developments and to promote the EU legislation and standards -PM =Action plan adopted by end 11/2018</p> <p>c) Develop and promote together with the EC a Railway System strategy supported by common positions for the future development of the framework</p> <p>d) Develop proposals for research targeted at the future target railway system (the big picture) according to the ERA Research Strategy</p> <p>e) Involve non-EU entities in the development of ERA proposals line with Adm. Arrangement with OSJD/OTIF/ that the EU Regulation on standards meets the needs and is adopted by these organisations – continuous</p> <p>f) On request, provide Commission with the required support on railway related international relations and trade negotiations disseminating and promoting the EU acquis (e.g. Technical working group envisaged by the Japanese trade agreement talks) (ACT 2017-76)</p> <p>g) To make proposals for mechanisms through RASCOP to ensure that standards development delivers the most viable solutions and that the needs of the EU SERA (e.g. interoperability) are met by international standards (ACT 2017-89)</p> |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|--|---|---|------------------|--|
| | Loss of interoperability after GSM-R | <ul style="list-style-type: none"> > Obsolescence of GSM-R technology (e.g. IMs or RUs decide to procure communication systems (replacing GSM-R) incompatible with target solution) > The Agencies Program on evolution of radio does not deliver timely (in 2022) new standards as replacement for GSM-R in the CCS TSI > Member state may decide on an allocation of radio spectrum incompatible with target solution | <p>May be caused by:</p> <ul style="list-style-type: none"> > No consensus on functionality, technical solution, migration strategy of the communication system > No suitable radio spectrum available, in particular for the transitional period > Low level of contribution by stakeholders to the Agency project (i.e. definition of new communication system), so that results of studies and standards are not sufficiently representative | High (12) | <ul style="list-style-type: none"> > Define and implement a new system to replace GSM-R > Report to the EC on the definition of the new system <ul style="list-style-type: none"> a1) First intermediate report a2) Second intermediate report > Provide recommendation to the EC for changes in CCS TSI <ul style="list-style-type: none"> b1) First report b2) Second report |
| 10 | Unsatisfactory process for ERTMS pre-approval | <ul style="list-style-type: none"> > Dissatisfaction to NSAs and Infrastructure managers (IMs), possibly causing shortfall to the Agency (i.e. refusal of IMs to pay the fees for ERTMS Trackside approval if the service provided by the Agency is not considered as value for money) > Loss of credibility for the Agency and – in a worst case scenario - possible intervention from European Commission | <p>May be caused by:</p> <p>Inability:</p> <ul style="list-style-type: none"> > Commission Recommendation on harmonised implementation of ERTMS does not satisfy stakeholders. > to source resources to carry out process | High (12) | <ul style="list-style-type: none"> a) Set up of a pool of experts (via a framework contract) |
| 11 | Delay in the availability of the mature One Stop Shop product | <ul style="list-style-type: none"> > Delay in the implementation of the Agency new tasks –i.e. granting safety certificates and issuing vehicle authorisation | <p>May be caused by:</p> <ul style="list-style-type: none"> > The operational availability of the 'One stop shop' tool is delayed (i.e. development lifecycle, business requirements v1.0 not delivered according to plan, disagreement Agency/NSAs), practical arrangements documents not agreed by the end of 2016 | Medium (5) | <ul style="list-style-type: none"> a) Develop a Business Continuity Plan that can be activated in case the OSS is not operational by the scheduled date |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|---|--|--|------------------|---|
| 12 | Stakeholder alignment and mobilisation | <ul style="list-style-type: none"> > Inability of the Agency to expose the reality of its work and to influence the way its message is received by the stakeholders > Difficulties: <ul style="list-style-type: none"> - to approach stakeholders who are resistant/relevant/ ambivalent to support Agency objectives - in maintaining stakeholders engagement > Low interest of stakeholders in Agency's work > Inconsistency and low quality of the messages sent by the Agency | <p>Activity 5: Delivering efficient and effective services</p> <p>Objective 5.4: Communicating effectively through website and social media</p> | Medium (8) | <ul style="list-style-type: none"> a) Continue implementation of ERA communication strategy action plan b) Implement communication plan 2018 c) Define and simplify the use of MS Project d) Define reporting requirements for the MT e) Implement the action plan following the readiness questionnaire results |
| 13 | Unjustified carry-overs higher than the acceptable levels of the CoA | <ul style="list-style-type: none"> > Significant carry-overs of committed appropriations for operational expenditures putting annuality principles at risk (resulting in a potential negative revision of the Agency's budget for the year n+1.) > Delays in the implementation of the Work Programme > High exposure to criticism from ECA and the Budgetary Authority (putting at risk the discharge process) | <p>Activity 5: Delivering efficient and effective services</p> <p>Objective 5.2 Ensuring sound management of the Agency's human and financial resources and building facilities</p> | Medium (8) | N/A |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|--|---|--|------------------|--|
| 14 | Strategic alignment of the sector in ERTMS | <ul style="list-style-type: none"> > Damage to the reputation of ERTMS as a system which can jeopardize the full achievement of the Agency's ERTMS objectives <p>May be caused by:</p> <ul style="list-style-type: none"> > Delays in reaching milestones on cooperation (such as signing of Memorandum of Understandings), > Inability to have a common position on important matters (such as Automatic Train Operation). > Lack of commitment from supply industry to quality and cost-effective products and disciplined implementation | <p>Activity 2: Developing the harmonised regulatory SERA framework</p> <p>Objective 2.3 Harmonised Train Control System and telematics</p> | Medium (6) | a) Implement the action plan (develop KPIs for follow-up) |
| 15 | Non-compliance with the rules on Ethics and prevention of fraud | <ul style="list-style-type: none"> > Increase of the likelihood of not compliance with the rules regarding ethical obligations > Ineffective prevention and detection of potential cases of conflict of interest | <p>Activity 5: Delivering effective and efficient services</p> <p>Objective 5.1 Ensure good corporate governance</p> | High (15) | a) Implement the action plan of the Anti-fraud strategy with a focus on the measures included in Framework on Administrative Behaviour –prevention and management of conflict of interest |
| 16 | Business Continuity | <ul style="list-style-type: none"> > Loss of critical data resulting in putting at risk the performance of critical business processes | <p>Activity 5: Delivering effective and efficient services</p> <p>Objective 5.2 Ensuring sound management of the Agency's human and financial resources and building facilities</p> | Medium (4) | a) Conduct a Business Impact Analysis (BIA) on the impact of a disruption to the functions (i.e. activities, services, infrastructure, human resources) that support the delivery of Agency key objectives |

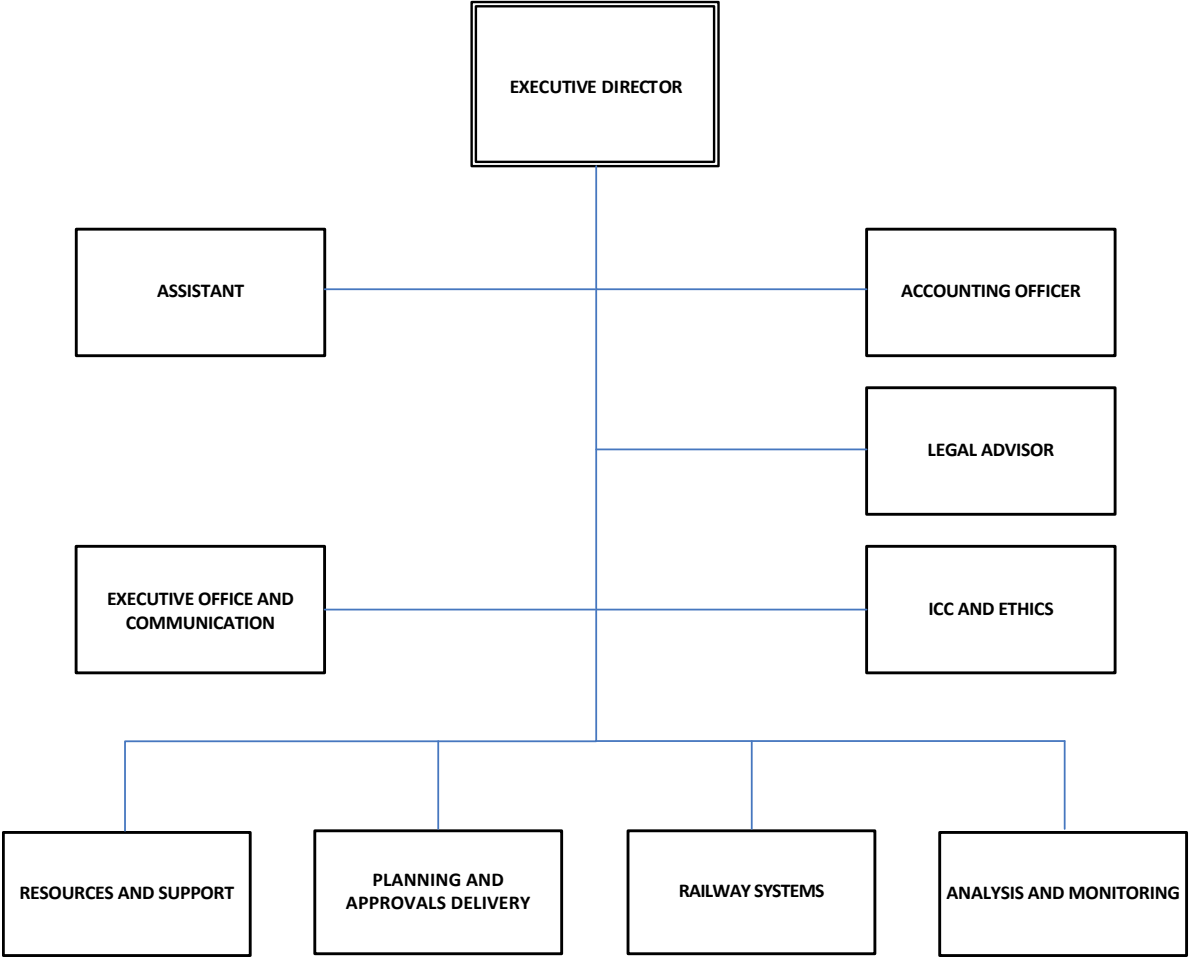

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|---|---|--|------------------|---|
| 17 | Risk of ineffective procedures for issuing authorisations related to ERTMS | <ul style="list-style-type: none"> > Ineffective and inappropriate Agency response to applicants request for advice for compatibility with ERTMS subsystem | <p>Activity 2: Developing the harmonised regulatory SERA technical framework</p> <p>Objective 2.3 Harmonised Train Control System and telematics</p> | Medium (9) | <p>a) Develop s procedure/guidelines for the process of advising on compatibility between ERTMS on-board and trackside subsystems, compliant with CCS TSI revision and route compatibility concept</p> <p>-First version to be agreed with the railway sector</p> |
| 18 | Insufficient progress towards achieving regulatory reform and convergence with the EU railway area in the Mediterranean region | <ul style="list-style-type: none"> > Disruption and delays in the implementation of project activities > Insufficient interest from the countries which will benefit of the project activities > Underspending concerning the EUMEDRAIL project funded under the European Neighbourhood Instrument - entail a reputational risk beyond the ordinary taking into account the amount involved (2 mill. Euros) and the international context | <p>Activity 1: Contributing to shaping target and global reference</p> <p>Objective 1.4 Implementing the EU Medrail Project</p> | Medium (8) | <p>a) Continue to redeploy Agency staff to assist in the implementation of project activities</p> <p>b) Call upon independent experts to assist the Agency in the implementation of the project</p> <p>c) Work closely with European External Action Service (EEAS) by inviting systematically to all meetings in the countries involved in the project</p> |
| 19 | Risk of absence of a working language regime in the Agency | <ul style="list-style-type: none"> > Financial consequences -Translation costs impacting Agency budget > Legal consequences - Translation that can be contested in Court (increase number of litigations) and non-compliance with legal deadlines for delivering the Agency outputs > Reputational consequences | <p>Mainly</p> <p>Activity 3: Implementing the harmonised regulatory SERA technical framework (under 4RP)</p> <p>Objective 3.1: Ensuring the coordination of the Fourth Railway Package implementation</p> <p>Objective 3.2 Issuing Single Safety Certificates</p> <p>Objective 3.3 Issuing Vehicle Authorisation, including ERTMS on-board assessments</p> <p>Objective 3.4 Issuing ERTMS trackside approvals</p> | High (16) | N/A |

| Number | Title | Risk description Consequence/Cause | Activity/Objective 2019 | Residual risk | Measures to achieve acceptable risk for management |
|--------|---|--|--|------------------|---|
| 20 | Failure to conclude bilateral cooperation agreements (as per art.76 of the AR) | <p>(in the absence of common elements/guidelines)</p> <ul style="list-style-type: none"> > Lengthy negotiations in view of conclusion of specific (bilateral/ multilateral) agreements with NSAs which may lead to delay in the implementation of the new tasks in June 2019 > Inconsistent and inefficient approach regarding functions/ tasks/ conditions for deliverables between ERA and NSAs with potential negative consequences on smooth delivery of the new tasks by the Agency. > Uncertainties regarding the level of cooperation of NSAs (compliance with the legal deadlines for issuing authorisations; insufficient number of experts provided by NSAs) | <p>Mainly</p> <p>Activity 3: Implementing the harmonised regulatory SERA technical framework (under 4RP)</p> <p>Objective 3.2 Issuing Single Safety Certificates</p> <p>Objective 3.3 Issuing Vehicle Authorisation, including ERTMS on-board assessments</p> | High (16) | <p>a) Negotiate at government level in view of determining reluctant NSAs to conclude framework agreement.</p> |
| 21 | Risk of misalignment between S2R activities and regulatory provisions | <ul style="list-style-type: none"> > Regulatory provisions on railway interoperability & safety are not considered > European financial assistance not spend in most effective manner | <p>Activity 4: Monitoring, evaluating and reporting</p> <p>Objective 4.3. Identifying research needs for the Target Rail System and supporting partner organisations in research and innovation</p> | Medium (6) | <p>a) Coordinate with S2R and the EC to ensure that the research needs identified by the Agency are properly taken into account under S2R projects at two levels: - Head of Unit level - Executive Director level</p> |

Annex VIII: Procurement plan 2019

| Activity | Title | Description | Indicative Timeframe | Estimated amount to be committed in 2019 | Market Ceiling | Type Of Contract |
|------------|---|--|---|--|----------------|--|
| Activity 2 | Training video clips on OSS, SSC and VA | To facilitate on-line training and dissemination on VA and SSC | Q3 | 25,000.00 | 400,000.00 | Framework Contract |
| Activity 3 | External Service Provision for ERA Information System Development | Development and support of information systems - Intra-muros (Registers) | Q3 | 600,000.00 | | ESMA Framework Contract |
| Activity 3 | External Service Provision for ERA Information System Development | Development, studies and support of information systems - Extra-muros (OSS) | Q1 | 900,000.00 | | Current Framework contract |
| Activity 4 | Monitoring training | ISO training lead auditor; ISO standard 17000 series; Tailored made training for the NSA monitoring audit tools | Q1 | 95,000.00 | 430,000.00 | New Framework Contract |
| Activity 5 | Website_design | Web design services provided by Intrasoft | Q2 | 50,000.00 | | Framework contract |
| Activity 5 | Website_development | This activity includes the maintenance and development part of the website. New functionalities and substantial changes of the structure can be applied only by DGIT. (MoJ with DGIT) | Q3 | 50,000.00 | | MoJ (DGIT) |
| Activity 5 | Conferences | Contract for the organization of CCRCC Conference | Q3 | 100,000.00 | | Direct Contract |
| Activity 5 | Multimedia content production | Creation of contents related to daily work done at the Agency. Raise awareness, dissemination etc. | Q1 | 22,500.00 | | Direct contract |
| Activity 5 | External Service Provision for ERA Information System Development | Development and support of information systems - Intra-muros (general IT) | Q1 | 800,000.00 | | ESMA Framework Contract |
| Activity 5 | Maintenance, support and Licenses | Maintenance, support and Licenses | Q1 | 300,000.00 | | DIGIT Framework |
| Activity 5 | EU-CERT | EU-CERT | Q1 | 70,000.00 | | EC |
| Activity 5 | Back-up site | Back-up site | Q1 | 60,000.00 | | CDT |
| Activity 5 | Microsoft Support | Microsoft support | Q1 | 100,000.00 | | DIGIT Framework |
| Activity 5 | Communication services | 4 years FWC - 3 lots: Lot 1: Photography, multimedia services, live streaming; Lot 2: Graphic design and DTP; Printing, Strategic comms, Editorial support; Lot 3: Events management. | Applicable from 2020 (no budget impact in 2019) | - | 1,400,000.00 | New Framework Contract (Lot 1 and 2 are currently done by Page In Extremis, exp.2020. The idea is to have a unique FWC for the 3 type of services). In 2019 we run ONLY the procurement process. |
| ALL | Catering services | Catering services (meetings) | Q1 | 150,000.00 | | Current Framework contract |
| ALL | Travel Agency | Travel Agency (missions) | Q1 | 200,000.00 | | Current Framework contract |
