

20 YEARS OF EMPOWERING EUROPEAN RAILWAYS.

2004
ERA is born!
A NEW BEGINNING
FOR THE GOVERNANCE OF
EUROPEAN RAILWAYS.

2005

Becoming fully operational

2006

1st recommendation for a TSI issued by the Agency

2007

3rd railway package is adopted in October 2007

2008

1st Safety Report is published

2009

1st Interoperability Report is published

Common Safety Method for Risk Evaluation and Assessment

2011

2010

Common tools for the European railways leading to enhanced coordination

2012

The Single European Railway Area (SERA) is established, a symbolic step forward towards the Europeanisation of railways

ERA fosters progress with interoperability and safety

2013

Stronger role in the monitoring of national safety authorities and notified bodies, in particular the national safety authorities and the notified bodies

2014 End of Mandate Marcel Verslype

2015 Start of Mandate Josef Doppelbauer

- Malta
- Helsinki
- Berlin
- Amsterdam
- Brussels

2019

16th of June

Vehicle authorisation (VA), Safety Certification (SSC), and ERTMS Trackside approval

- 1st VA signed
- 1st SSC signed

2020

Record cleaning of National Rules from over **14 000 to 955** between January 2016 and December 2020

1st BoA case

2018

1st Biennial Report covering both Safety and Interoperability is issued by ERA

2017

Common Safety Methods (CSM) become an essential tool for all rail actors at European level

Preparing Implementing Acts on Vehicle Authorisation and Safety Certification

SERA Conferences

2016

4th Railway Package enters into force. A new era with a fully-fledged package of tasks

2021

European Year of Rail

The Agency has developed a unique safety perception survey, the European Rail Safety Climate Survey (ERA-SCS)

2022

ERA presents its compelling vision for the target railway system

2023

Major milestone achieved by ERA: More than 70 000 rail vehicles authorised

New TSI Package comes into force

ERA signs 1st Authorisation for New Generation Sleeper Trains: a substantial step for reviving Night Trains in Europe

ERA signs the European Union Agencies Network's Diversity Charter

2024

ERA Training Catalogue building together the skills for rail professionals

Start of 4RP Taskforce

Transformation of the Railway System

- ❑ From analog to **digital systems** - physical vs. digital infrastructure; generalization of ICT; increased **connectivity**
- ❑ From proprietary HW/SW to **COTS/open SW**; appearance of **cloud-based systems**
- ❑ National systems vs. European integration (**cross-border risks**)
- ❑ Modal siloes vs. **multimodality** – intercommunication of threats
- ❑ Application of **Artificial Intelligence (AI)** techniques

Challenges – Capacity, Punctuality, and Reliability

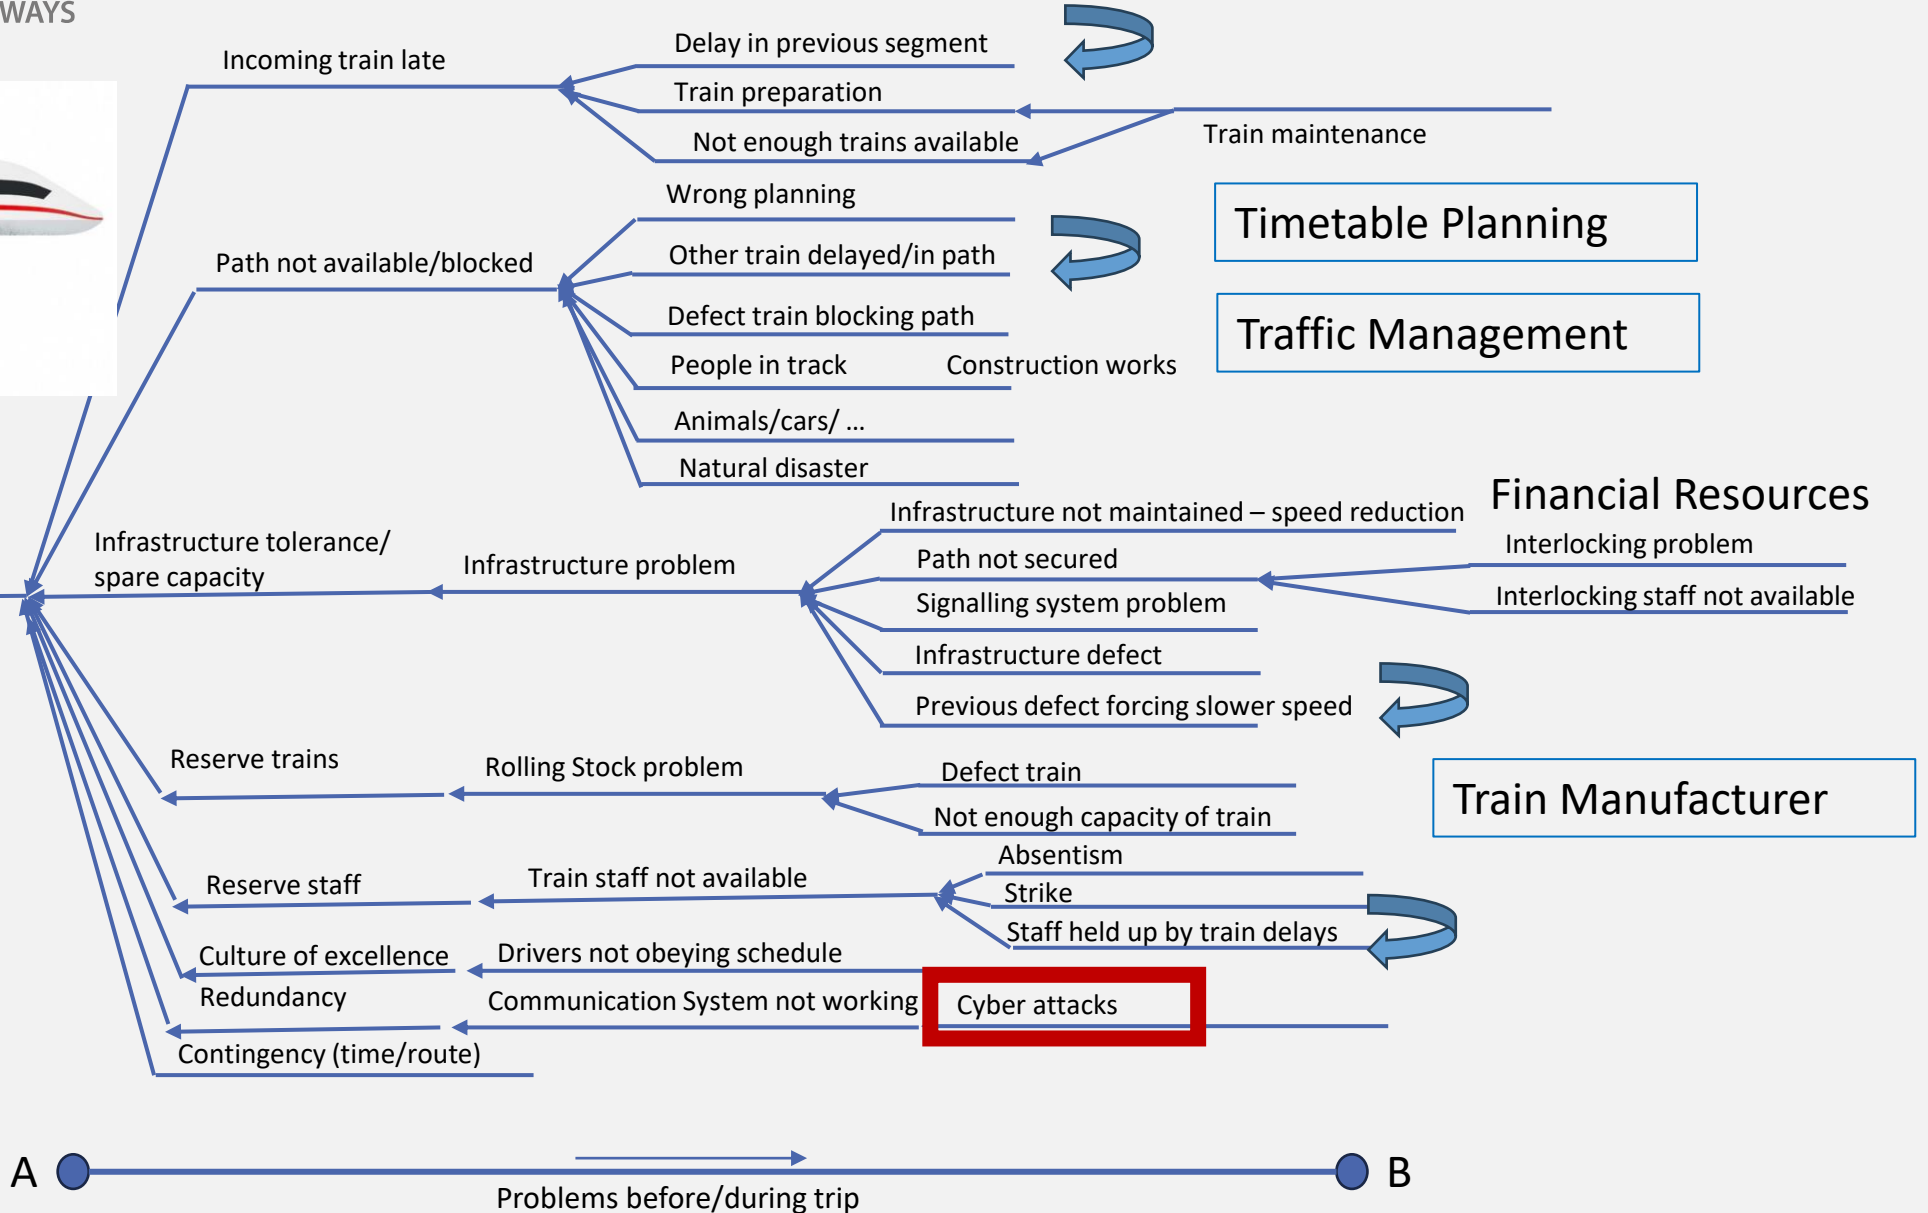

Delay Cascade Effect

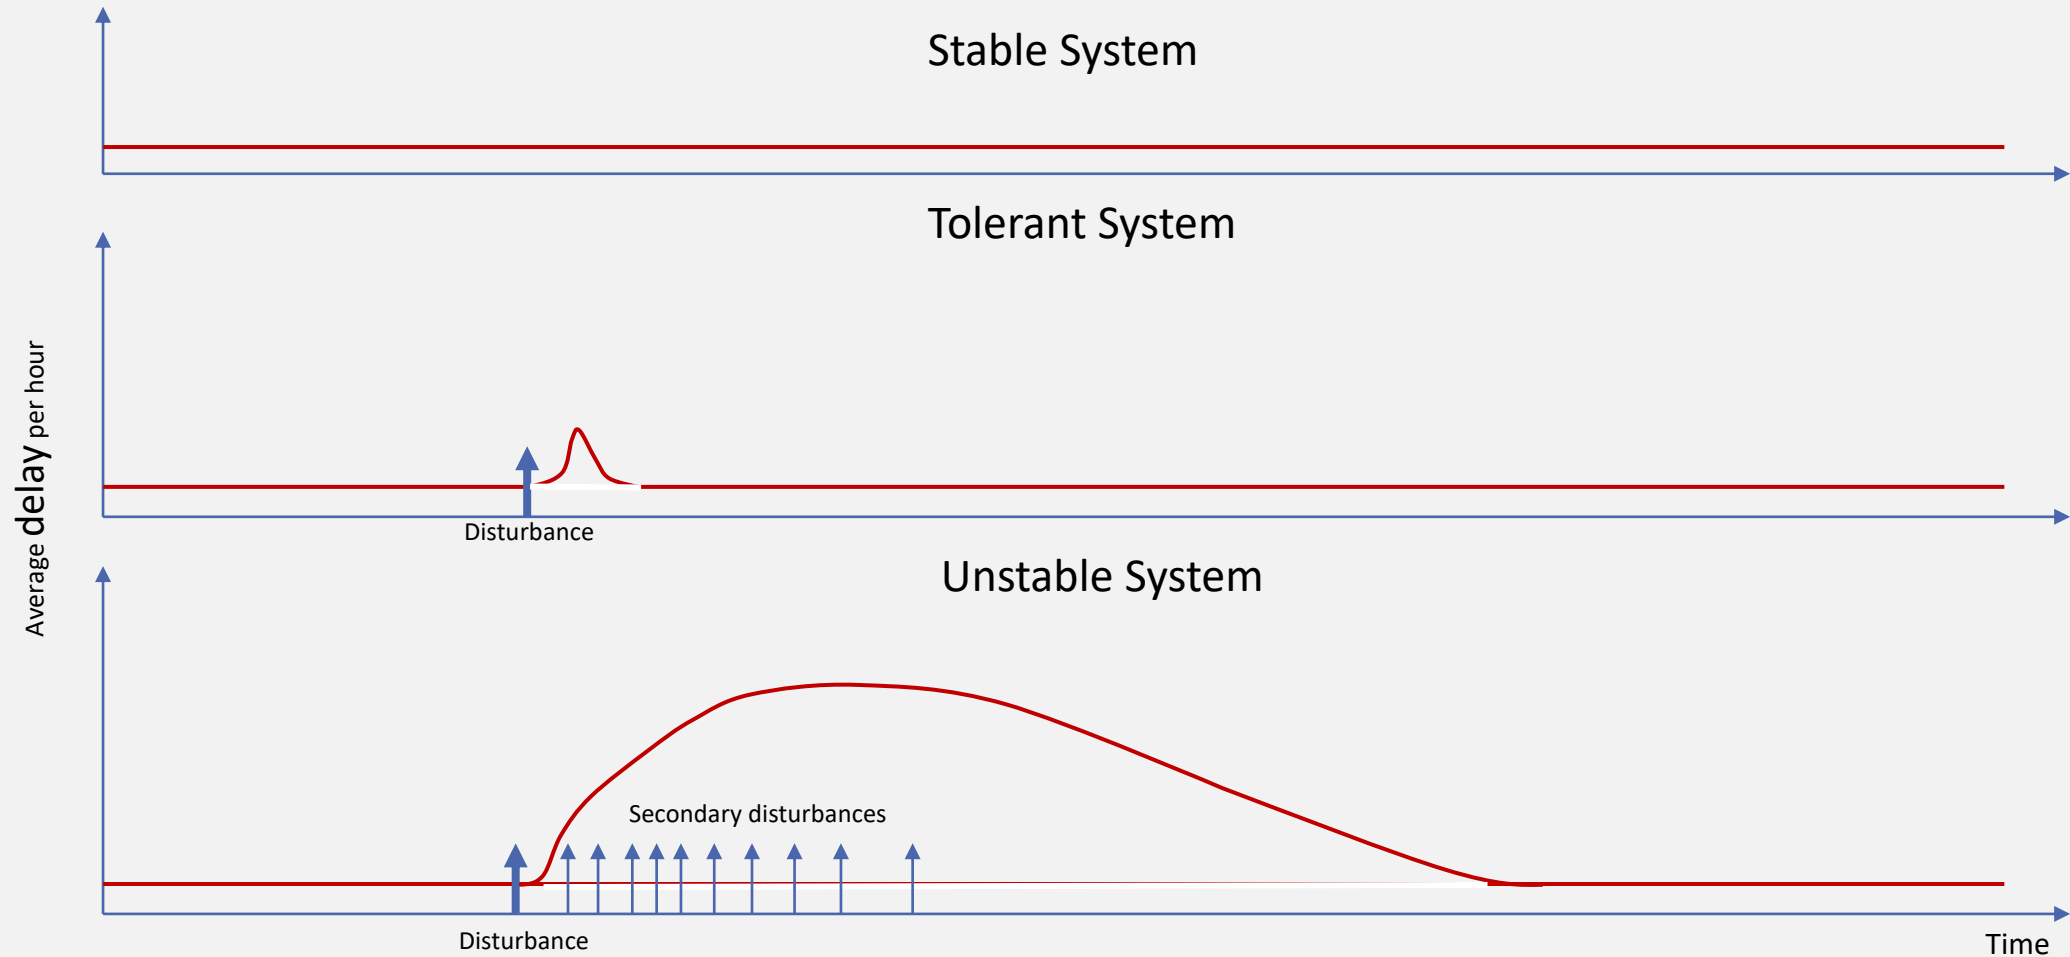

Punctuality
(actual time of arrival – planned time of arrival)

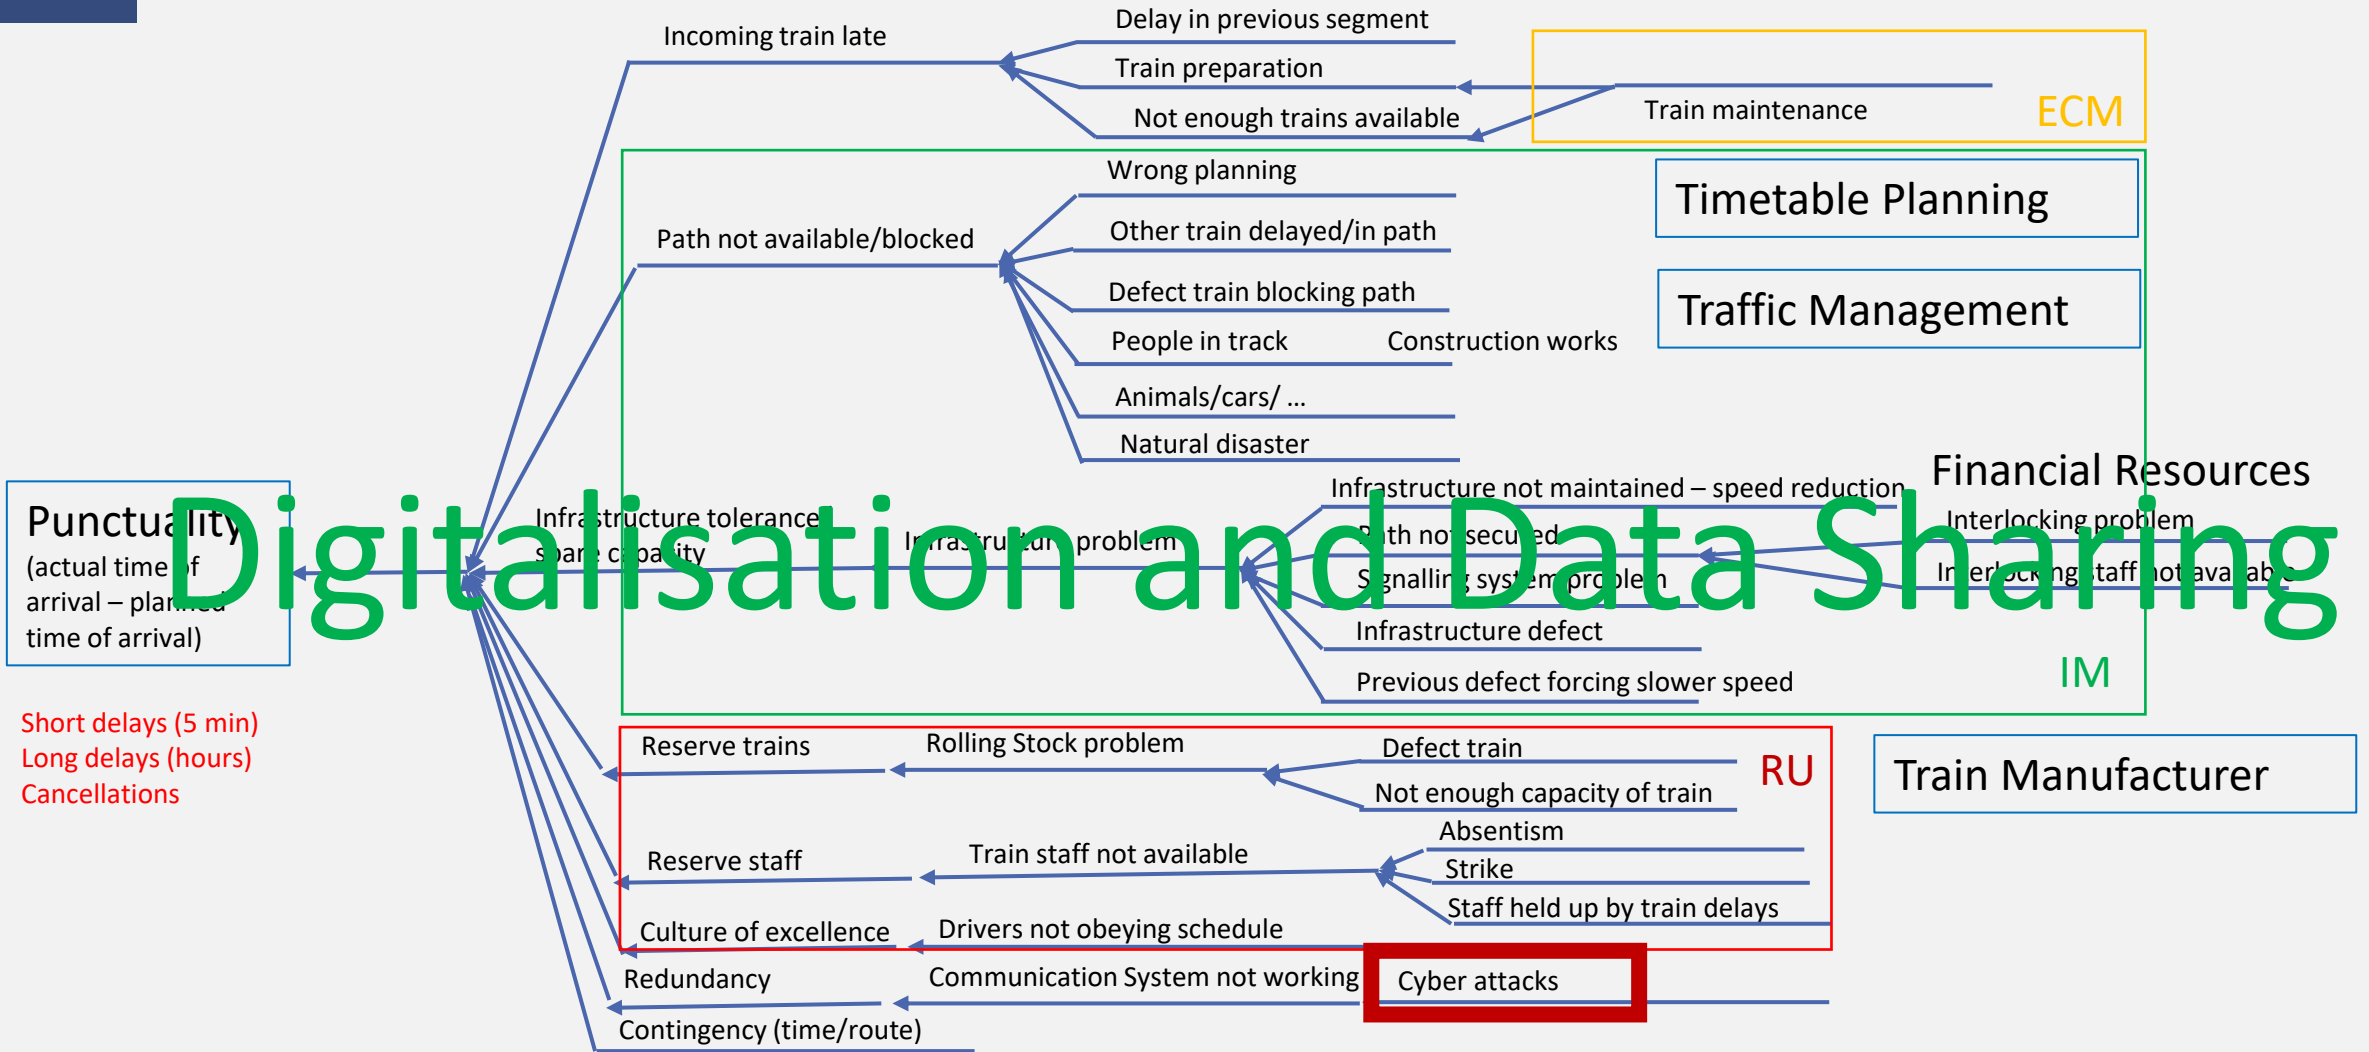

Short delays (5 min)
Long delays (hours)
Cancellations

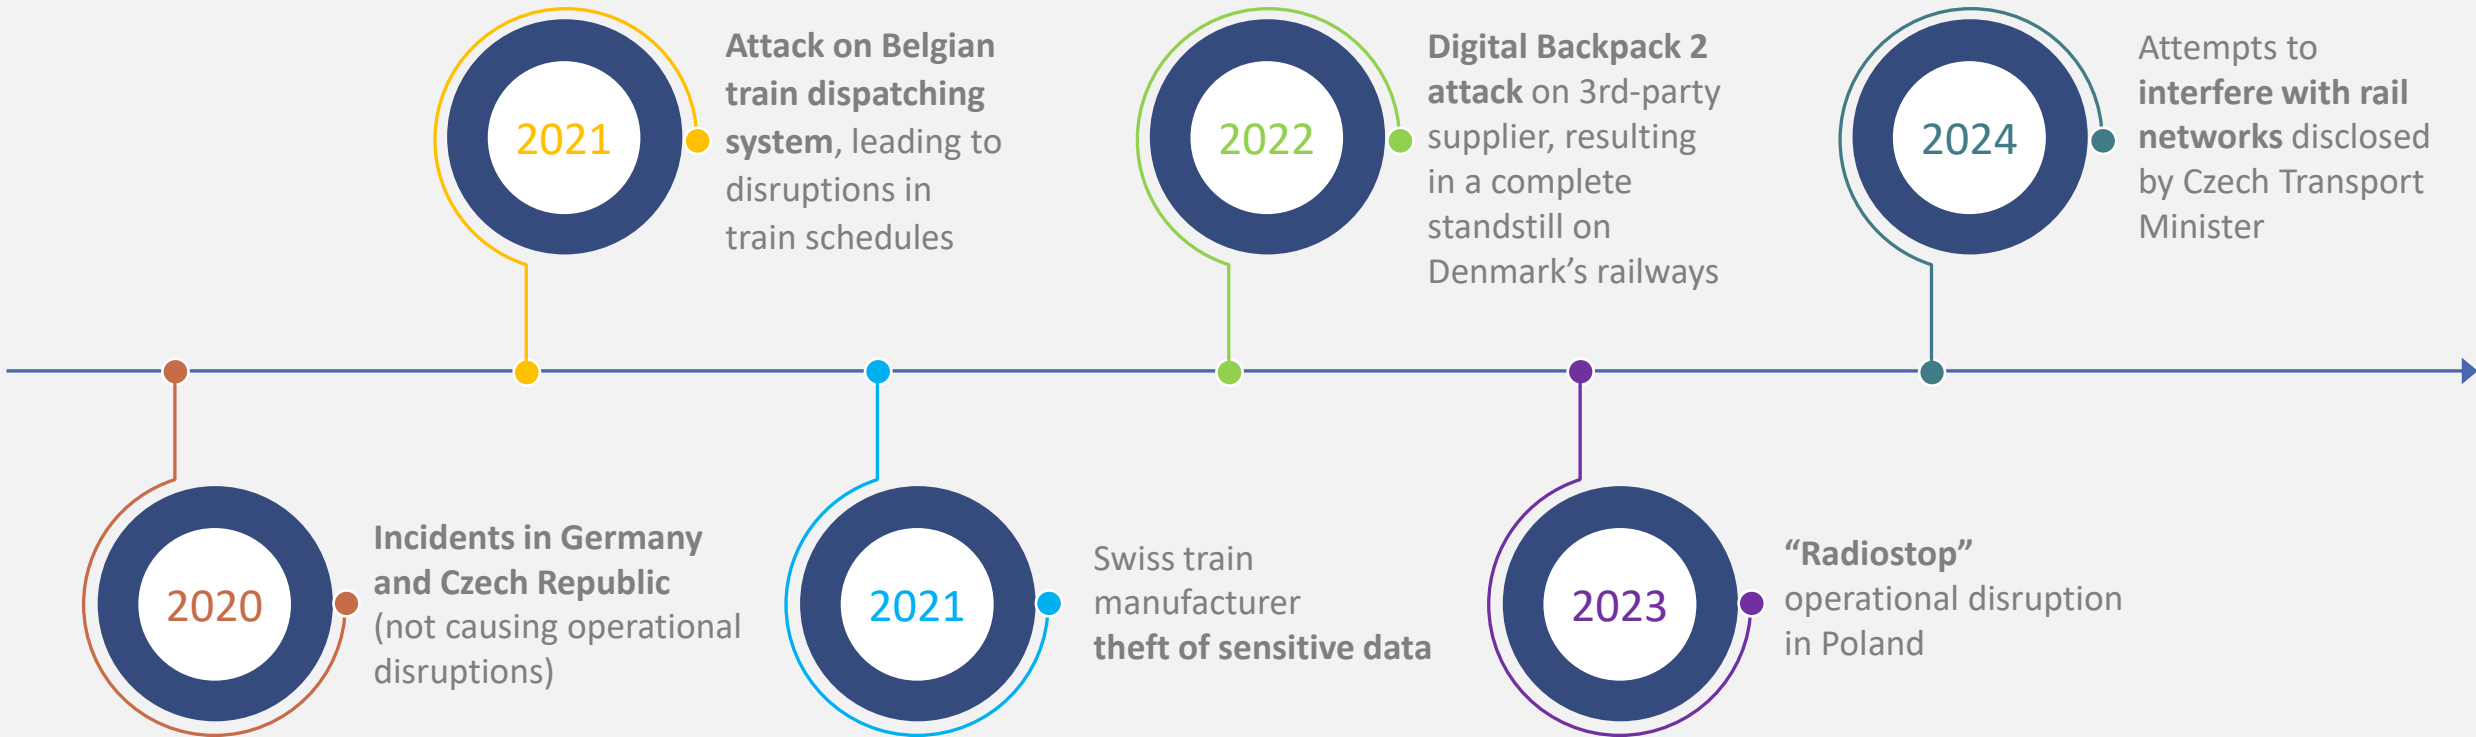

Stable Operation is Needed

Rail Operation is a Complicated Process

Attacks Demonstrate Vulnerability

DE: Cable cuts in October 2023

FR: Attacks on rail cables in July 2024

DB: IT problems block GSM-R – 07 September 2024

(Positive example: France during 2024 Olympics)

Cybersecurity @ERA

Regulation considerations

- Monitor relevant activities related to **cybersecurity in the railway context**
- Cover safety requirements of the rail system, e.g. the assessment of **safety consequences originated by security threats**
- Reflect the above in **Technical Specifications for Interoperability and Common Safety Methods**

Cooperation building

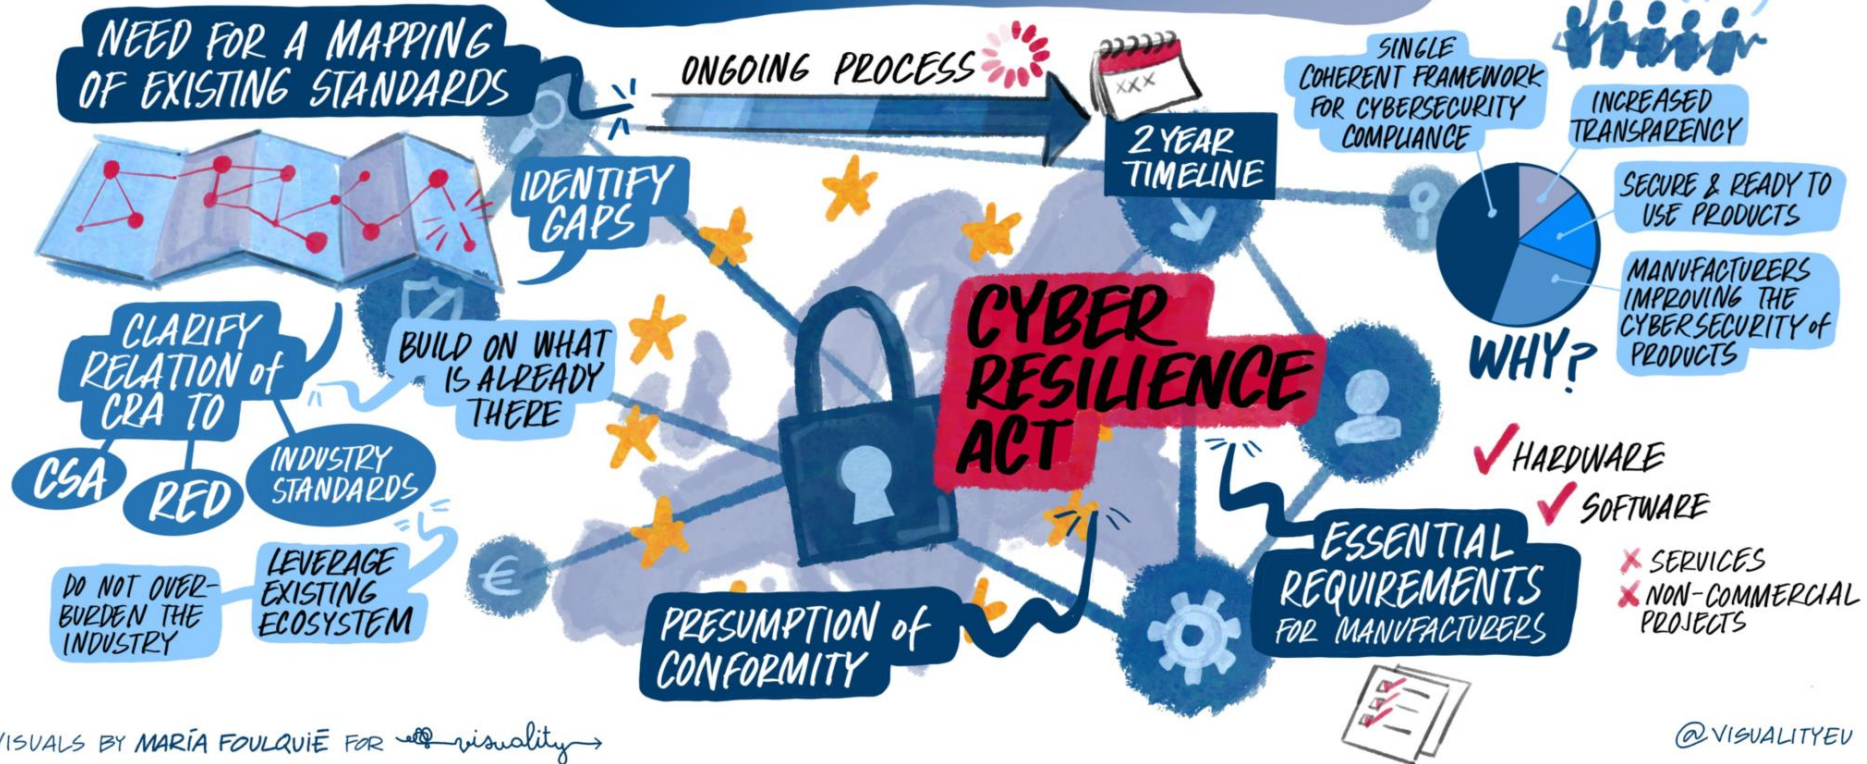

- Close relationship with **ENISA** and **European Commission**
- Cross-fertilisation with **EASA** and **EMSA** to develop a transport cybersecurity policy
- Dialogue with **National Cybersecurity Agencies** (e.g. ANSSI, BSI)
- Support **sector-led Information Sharing initiatives**

CYBERSECURITY STANDARDISATION CONFERENCE 7 FEB 2023

CYBER RESILIENCE ACT - A GAME CHANGER: HOW CAN STANDARDS SUPPORT IT

PANEL 2

ERA-ENISA collaboration

ERA-ENISA COLLABORATION

- Implementation of NIS2
- Impact of EU certification
- Common safety methods and technical specifications for interoperability

Policy

- Awareness raising
- Skills programmes
- Trainings, exercises
- Events

Capacity and skills

MFA for Access to ERA Resources

following Cybersecurity regulation (EU, Euratom) 2023/2841

2

- Redefines the cybersecurity landscape for institutions, bodies, offices, and agencies of the European Union (Union entities).
- It represents a proactive stand against the evolving spectrum of cyber threats that challenge the integrity, confidentiality, and availability of information systems of Union entities.

Article 6(8) requires the appointment of the **Local Cyber Security Officer (LCSO)**. ERA has implemented this provision with:

- **Luca TRINCA** as Local Cyber Security Officer (LCSO)
- **Kleon KLEANTHOUS** as alternate Local Cyber Security Officer (LCSO) - Point of Contact (PoC)

THANK YOU

Moving Europe towards a sustainable and safe railway system without frontiers.
